Brief description of the most material risk factors pertaining to the Guarantor and the Group	<p>The Guarantor is an investment and holding company, which means that if the Subsidiaries fail to make a profit, they will not be able to pay the Guarantor a share of the profits in the form of dividends or repayment of the intragroup loan. The Guarantor is therefore indirectly affected by the risk factors affecting the business of the Subsidiaries.</p> <p>The following are the main risk factors that may adversely impact the financial and economic standing and business of the Guarantor and the Group:</p> <p>(a) The recent outbreak of COVID-19 could adversely affect the Group's business - The recent outbreak of the COVID-19 and its development into a global pandemic has and certainly further will have major economic consequences for the Ukrainian economy.</p> <p>(b) The Group is dependent on external contractors to develop and enlarge the projects - The Group's reliance on general contractors and individual contractors also exposes the Group to risks associated with any poor performance or work ethic of such contractors and their subcontractors and employees, construction defects and financial instability of the contractors and their subcontractors.</p> <p>(c) Credit Risk - The Guarantor provides unsecured loans to its Subsidiaries. Recoverability of these loans depends on operation results of the Guarantor's investees owning the income generating real</p>																														

	<p>estate. If the investees are unable to repay the loans provided by the Guarantor, it would ultimately affect the business of the Guarantor and the Group.</p> <p>(d) The legislative steps taken by the Ukrainian Government in response to the COVID-19 outbreak affect the Group's business - In response to the COVID-19 outbreak, the Parliament of Ukraine adopted a number of laws supporting the tenants during the lockdown period by allowing them to demand a rent reduction from the lessors, provided that the tenants had no objective possibility to use the leased real estate. As a result, the Group experienced decrease in NOI in 1H 2020 by 9.0% year-on-year¹. In addition to the COVID 19's related restrictions that were imposed by the Ukrainian local authorities in March 2020 this decrease was also driven by the devaluation of Ukrainian hryvnia by 13% in 1H 2020.</p> <p>(e) The Group's ownership interests or lease rights in land may be challenged - There is a risk that the state registrars or a third party may challenge ownership interests or lease rights in land because of their origin or former registration or for other reasons. This may lead to additional expenses and title risks for the Group.</p> <p>(f) Property Risk - Property and property related assets are inherently difficult to value due to the individual nature of each property and the fact there may not be a liquid market or pricing mechanism available. As a result, valuations may be subject to substantial uncertainty.</p>
--	---

3.4 What are the key risks that are specific to the Bonds?

<p>Major risks that are specific to the Bonds.</p>	<p>There exist, in particular, the following risk factors relating to the Bonds:</p> <p>(a) Risk of default and risk related to the redemption of the Bonds by the Issuer - Much like any other monetary debt, the Bonds are exposed to the risk of default.</p> <p>(b) Risk of the interest rate on the Bonds - The holder of a bond with a fixed interest rate is exposed to the risk of a decrease in the price of such a Bond as a result of changes in the market interest rates. While the nominal interest rate is fixed for the term of the existence of the Bonds, the current interest rate on the capital market (market interest rate) usually changes daily.</p> <p>(c) Risk of Early Redemption - In case of a full or partial early redemption of the Bonds, including where this takes place without the consent of the particular Bondholder, in accordance with the Terms and Conditions prior to their redemption date, the Bondholder is exposed to the risk of the yield being lower than expected due to such early redemption.</p> <p>(d) Liquidity risk on the Regulated Market of the PSE - The Issuer will apply for the Bonds to be listed for trading on the Regulated Market of the PSE. Regardless of the listing of the Bonds on a regulated market, there can be no assurance that a sufficiently liquid secondary market in the Bonds will be created or, if it is, that such a secondary market will continue to exist. The fact that the Bonds may be listed on a regulated market may not necessarily lead to the higher liquidity of such Bonds in comparison with the Bonds not listed on a regulated market. Bonds which are not listed on a regulated market may be difficult to value, which may have an adverse impact on their liquidity. On a potentially non-liquid market, the investor may not be able to sell the Bonds at an adequate market price at any time.</p> <p>(e) Fees - The overall return on the investment in the Bonds may be affected by the level of fees which are charged by the securities trader or another intermediary of the purchase or sale of the Bonds or by the relevant clearing system used by the investor.</p> <p>(f) Bond purchase lawfulness risk - The prospective buyers of the Bonds (especially foreign persons) should be aware of the fact that the purchase of the Bonds may be subject to legal restrictions affecting the validity of the acquisition.</p>

The maximum amount for which an individual investor is to be entitled to subscribe for the Bonds will be limited by the projected total nominal value of the Issue. If the volume of the Orders exceeds the volume of the Issue, the Manager may reduce the investor's Orders at its discretion (provided that any surplus will be immediately returned in the investor's account).</p> <p>The final nominal value of the Bonds assigned to the individual investor will be stated in the transaction clearing confirmation, which will be delivered to the investor by the Manager without unreasonable delay after the execution of the instruction. The investor may not trade in the subscribed Bonds before this confirmation is delivered.</p> <p>The issue price of all Bonds issued as of the Issue Date is 100%.</p> <p>The Issue Price of any Bonds issued after the Issue Date will be determined by the Manager on the basis of the current market conditions. Where relevant, a corresponding accrued interest will be added to the amount of the Issue Price of any Bonds issued after the Issue Date.</p>

	<p>An investor who will subscribe for or purchase the Bonds through J&T BANKA in the Slovak Republic will pay the fees in accordance with the current pricelist of the Slovak branch of J&T BANKA applicable on the date of the transaction. II. RISK FACTORS

Investors considering the subscription or purchase of the Bonds should carefully read this Prospectus in its entirety. The information presented by the Issuer to the potential subscribers or purchasers of the Bonds as well as any other information provided in this Prospectus should be carefully examined and considered by each party interested in the subscription or purchase of the Bonds.

The subscription, purchase, holding and potential resale of the Bonds are associated with a number of risks (including the risk of losing the entire investment), and the risks considered material by the Issuer are specified below in this Chapter. The text below does not substitute any professional analysis or any provision of the Terms and Conditions or data provided in this Prospectus, does not limit any rights or obligations arising from the Terms and Conditions and in no case is it an investment recommendation of any nature. Any decision to subscribe and/or purchase the Bonds should be based on the information contained in this Prospectus, on the terms and conditions of the offering of the Bonds and, in particular, on the analysis of the risks and benefits of the investment in the Bonds by the prospective investor and/or the investor's legal, tax and other professional advisors.

Risk factors are ranked in the individual categories and sub-categories from the most to the least significant.

Capitalised terms used below shall have the meanings assigned to them in the Terms and Conditions or any other part of the Prospectus.

1 Risk Factors Related to the Issuer

From the Issuer's perspective, there are the following main risk factors that may adversely impact its financial and economic standing, business and ability to meet its debts arising from the Bonds:

Risk of a secondary dependance

The Issuer is part of group consisting of the Guarantor and its direct or indirect subsidiaries (the **Group** and the subsidiaries as the **Subsidiaries**). As such the issuer is exposed to a secondary risk of dependence on risks relating to the Group whose activities includes investing in real estate sector in Ukraine. Due to the Issuer's dependence on the Group, all risk factors related to the Group described below may adversely affect the Issuer's ability to repay its debt from the Issue. The risk of secondary dependence may adversely affect the Issuer's ability to pay off the debts arising from the Bonds.

Risk of a special purpose-established company

The Issuer is a company established for the purpose of issuing the Bonds and subsequently providing intra-group financing and does not engage in any other business activity and therefore cannot create resources from other business activities to pay off the debts arising from the Bonds. The risk of the Issuer's credit dependence on the Group may therefore adversely affect the Issuer's ability to meet its debt obligations.

2 Risk Factors Related to the Guarantor and the Group

The Guarantor is an investment and holding company, which means that if the Subsidiaries fail to make a profit, they will not be able to pay the Guarantor a share of the profits in the form of dividends or repayment of the intragroup loan. The Guarantor is therefore indirectly affected by the risk factors affecting the business of the Subsidiaries.

From the Guarantor's perspective, there are the following main risk factors that may adversely impact its financial and economic standing, business and ability to meet its debts arising from the Financial Guarantee:

Operational risks

The recent outbreak of COVID-19 could adversely affect the Group's business

The recent outbreak of the coronavirus SARS-CoV-2 (the **COVID-19**) and its development into a global pandemic will certainly have major economic consequences for the Ukrainian economy. Even though the full impact of the COVID-19 outbreak is, at the moment, very difficult to assess, it has already damped economic activity and eroded financial conditions across the European countries, including Ukraine. Measures implemented by state and local authorities of Ukraine to discourage or prohibit the movement of people, such as closing of public services, travel restrictions, border controls and other measures to discourage or prohibit the movement of people, are severely affecting many sectors and also largely contributes to the negative impact that the COVID-19 outbreak has on financial markets and level of economic activity in Ukraine. If the impact is severe or prolonged, it may result in reduced income of the Group due to vacancy of the real estate projects operated by the Group.

The possible economic downturn can have a significant negative effect on the real estate sector in Ukraine, including the Group. This may take the form of a reduction in the income generated from rents or reduction of profit due to increased vacancy in the real estate projects operated by the Group, therefore adversely affect the source of income of the Group and, as a result, adversely affect the Group's business and economic situation.

As of the date of this Prospectus, the COVID-19 has had no material impact on the vacancy of the real estate projects operated by the Group. However, the Group experienced decrease in NOI (as defined below) in 1H 2020 by 9.0% year-on-year². In addition to the COVID 19's related restrictions that were imposed by the Ukrainian local authorities in March 2020, this decrease was also driven by the devaluation of Ukrainian hryvnia by 13% in 1H 2020.

Besides that, there can be no guarantee that any similar pandemics or outbreaks will not occur in the future or that the effects of the current global pandemic will not deteriorate further. If such pandemics or outbreaks occur in the future, these may result in similar or more adverse effects as the COVID-19 pandemic, and could result in similar or further adverse effects on the Ukrainian economy.

The Group is dependent on external contractors to develop and enlarge the projects

The successful potential enlargement of the Group's projects depends on the Group's ability to hire general contractors and individual contractors (specialized e.g. in electricity, plumbing, etc.) to enlarge projects to international standards of quality and safety on commercially reasonable terms. Competition for the services of high quality general contractors and individual contractors and other factors may make it difficult to enter into contracting arrangements on commercially acceptable terms, within the required time frame, or at all. The replacement period of any individual contractor is about 20 days whereas the term of change of a general contractors is 45-60 days. The Group's reliance on general contractors and individual contractors also exposes the Group to risks associated with any poor performance or work ethic of such contractors and their subcontractors and employees, construction defects and financial instability of the contractors and their subcontractors.

Any failure of general contractors to meet international standards of high quality and safety could result in increased costs and may result in delays and cancellations, which could affect the marketability of the property. If the Group is unable to enter into contracting arrangements with high quality general contractors or subcontractors on commercially reasonable terms or their performance is substandard, the Group may be subject to increased costs or its projects may be delayed or cancelled, which could have a material adverse effect on the Group's business, financial condition and results of operations.

The development of the Group's properties is subject to a number of permits and administrative approvals and failure to comply with these requirements could adversely affect its business

In Ukraine certain planning approvals are necessary to receive a land lease or to purchase a land plot from public ownership. Certain development approvals are necessary to design, construct and put into operation shopping malls and other real property.

² Based on unaudited data of the Issuer.

The profitability of the Group will be in part dependent upon the continuation of a favourable regulatory climate with respect to its investments. Any failure to obtain or to continue to comply with all necessary approvals, licences or permits, including renewals thereof or modifications thereto, may adversely affect the Group's performance, as could delays caused in obtaining such consents due to objections from third parties. This, in turn, could have a material adverse effect on the Group's business, financial condition and results of operations.

The Group relies on certain key personnel

The Group's success depends to a significant extent upon the abilities and experience of the Group's executive officers and certain other key persons, whose continued service may not be guaranteed. As of the date of this Prospectus, the Issuer considers the following persons as the Group's key personnel: Mrs. Natalia Zolotarova, Mrs. Olha Turyk, Mr. Dmytro Kalinichev, Mr. Vasyl Bendas, Mr. Oleksandr Shmourgun and Mrs. Natalia Kravets. The departure of one or more key executives or other key personnel of the Group could have a material and adverse effect on the Group's business, results of operations, financial condition and prospects. In the event that key personnel choose not to remain with the Group, there is a risk that these key personnel may participate in a competing business. The Group's ability to recruit, motivate and retain personnel will be important to its development and there can be no assurance that the Group will be able to do so given the market in which the Group operates. As a consequence, any failure of the Group to attract, hire or retain suitable employees could have a material adverse effect on the Group's business, financial condition and results of operations.

Because the valuations of the Group's properties rely on certain assumptions and valuation models, it may not accurately reflect the actual proceeds that could be achieved upon a sale of the valued properties, and a material decline in future valuations could adversely affect the Group's financial results

The valuations of the Group's properties were made as at 31 December 2019, and the relevant figures do not reflect any changes in the value of the properties or market conditions since that time. In addition, certain assumptions and valuation models were used in the determination of the property values, and the use of different assumptions or models would likely produce different valuation results. As a result, the valuations represent best estimate of the value of Group's properties. However, there can be no assurance that they accurately reflect the actual proceeds that could be achieved upon a sale of the valued properties, particularly if, due to unforeseen circumstances, the Group were forced to sell investment properties prior to completion of their development. The Group's financial results are significantly influenced by the revaluation of its investment properties, which the Group intends to undertake at least once a year unless the directors decide otherwise. Any gains or losses arising from changes in the fair value of these properties are required to be included in the Group's income statement for the period in which they arise. As a result, any material decline in the value of the Group's investment properties could materially adversely affect the Group's results of operations and financial condition.

Corporate structure risk

The Group is structured as an investment holding with a concentration of interests at the ultimate holding company. Distribution of profits is currently maintained through a quasi-equity loan structure, given through a facility to the operating properties. Upon dividend pay-back different approaches may be taken to channel profits back to the holding level, through either the repayment of quasi-equity loans or by simple dividend repayments up to the ultimate holding level. According to effective legislation the Group uses the reduced rate of withholding tax on dividends and interest payments from operating Subsidiaries to the Guarantor. The Group may not be able to predict whether a favourable taxation or regulatory environment will exist at the time of dividend payments or be able to ensure that the dividend payments benefit from a low tax burden.

Difficulty of identifying and securing suitable disposals in the future

The Group could experience competition with other property owners in its efforts to dispose of assets, which may result in lower sales prices. Any such increase in prices for acquired properties or a decrease in prices for properties to be sold by the Group could impair its growth prospects or reduce available capital, either of which could adversely affect the Group's results of operations and financial condition. Because real estate investments are relatively illiquid, the Group may not be able to sell properties when appropriate and real estate investments generally cannot be sold quickly. As the Group's properties are subject to tax laws and financing covenants and the Group may encumber new or existing properties as a result of raising additional financing, the transfertability of which may be further restricted. As a result, the Group may not be able to vary its portfolio promptly in response to economic or other conditions, which could have an adverse effect on the Group's business, financial condition and results of operations.

The Group's future rental revenues will depend on the financial stability of its tenants

The financial stability of the Group's tenants may affect the financial performance of its properties. Tenant defaults could result in a significant reduction in rental revenues, which could require the Group to contribute additional capital or obtain alternative financing to meet obligations under any financing arrangements relating to such properties. In addition, the costs and time involved in enforcing rights under the lease with a defaulting tenant, including eviction and re-leasing costs, may be significant. The financial stability of tenants may change over time.

The predominant lease period in the real estate market in the Kyiv region is 1 year for retail premises and 2-3 years for offices and warehouses, whereas leases over 3 years must be registered and stamped by a notary. Although the notarial fee is paid by the tenant and its cost is marginal compared to the total lease value, it requires substantial efforts in collecting necessary paperwork and parties' transparency before one another. Larger tenants may receive a 5-year lease period, whilst leases over 5 years are rare and generally provided to large international tenants.

The overview of key tenants of each real estate project of the Group together with the lease periods is described in detail in Chapter X (*Information about the Guarantor*), Section 4.2 (*Overview of the real estate projects operated by the Group*) of this Prospectus.

Any adverse change in the financial condition of the tenants may negatively affect the value of property in which such tenants lease space and the amount of rental income from such property, which could materially adversely affect the Group's business, financial condition and results of operations.

The Group's properties face competition

The Group faces competition from other owners and operators of retail and commercial properties. Substantially all of the Group's properties face competition from similar properties in the same markets. Such competition may affect its ability to attract and retain tenants and reduce the rents the Group is able to charge. These competing properties may have vacancy rates higher than the Group's properties, which may result in their owners being willing to make space available at lower rental rates than the space in the Group's properties. In addition, the Group's retail properties compete with other retail distribution channels in attracting customers, including discount centres, outlet shopping centres, discount shopping clubs, direct mail, telemarketing and e-commerce, which could reduce demand for the Group's retail space. This combination of circumstances could adversely affect the Group's business, financial condition and results of operations.

The overview of key competitors of each real estate project of the Group is described in detail in Chapter X (*Information about the Guarantor*), Section 4.2 (*Overview of the real estate projects operated by the Group*) of this Prospectus.

The Group's business may be affected by relationships with state and local authorities

Historically, land in Ukraine was owned by the state and in most regions, including Kyiv, the state and local governments are still the main landowners who decide when and how to sell or to lease out land. Ukrainian state and local authorities have a high degree of discretion when selling land and allocating real estate projects. The Group's business therefore depends on maintaining positive relationship with the relevant state and local authorities. The Guarantor believes that the Group currently has good constructive professional relationship with the relevant state and local authorities. However, the business, financial condition and results of operations could be materially adversely affected if the Group's relationships with the relevant state and local authorities deteriorate in the future.

This factor relates both to the real estate owned by the Group and potential future acquisitions (if any). Three out of five the real estate projects currently being operated by the Group are located on municipal land. Shopping center Piramida and warehouse East Gate Logistic enjoy a twenty-five year lease valid until April 2025 and April 2030 respectively on the basis of the lease agreements entered with the local authorities. Rights to the land plot on which business center Eurasia is located is under the process of their formalization.

The Group may not be able to renew leases or re-lease space on favourable terms, or at all, as leases expire

Once completed, the financial performance of the Group's office and retail properties will depend on the Group's ability to lease available space. If tenants decide not to renew their leases upon expiry, the Group may not be able to re-lease their space on terms as favourable as those contained in the expired leases, if at all. This is especially relevant in respect of the significant tenants who produces significant portion of the Group's revenue. As of June 2020, Deloitte & Touche was the most significant tenant of the business center Prime owned by the Group (producing around 38% of the rental income³ from this project), EPAM, Lohika (IT company) and PricewaterhouseCoopers were the most significant tenants of the business center Eurasia owned by the Group (producing around 24%, 20% and 10% of the rental income from this project), Auchan and Fiege were the most significant tenants of the warehouse East Gate Logistic owned by the Group (producing around 79% and 21% of the rental income from this project respectively), Ekol Logistics, Lohistykh-Plius and Watsons were the most significant tenants of the warehouse West Gate Logistic owned by the Group (producing around 34%, 22% and 20% of the rental income from this project respectively) and Silpo was the most significant tenant of the shopping center Piramida owned by the Group (producing around 11% of the rental income from this project).

If tenants do not renew their leases, the Group may need to expend significant time and money to attract new tenants. If the Group cannot promptly renew the leases or re-lease the relevant space, or if the rental rates upon renewal or re-leasing are significantly lower than the expected rates, then the Group's business, results of operations, financial condition and prospects may be materially adversely affected.

In addition, in connection with any renewal or re-leasing, the Group may incur costs to renovate or remodel the space. Consequently, the Group's operating income could be reduced, which could materially adversely affect the Group's business, results of operations, financial condition and prospects.

Financial risks

Credit risk

Credit risk is the risk of financial loss to the Guarantor if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Guarantor's receivables from customers and investments in debt securities. The carrying amounts of financial assets represent the maximum credit exposure.

³ The term rental income used in this Prospectus means a sum of fixed rental income (rental income from offices, warehouse, retail premises and parking) and rent income paid from turnover (if applicable).

The Guarantor provides unsecured loans to its Subsidiaries. Recoverability of these loans depends on operation results of the Guarantor's investees owning the income generating real estate. If the investees are unable to repay the loans provided by the Guarantor, it would ultimately affect the business of the Guarantor and the Group.

The below table summarizes the intragroup loans of the Group as of 21 September 2020:

Some intragroup loans will be serving as a Security as described in Chapter XII (*Security*) of this Prospectus.

Despite all measures taken by the Guarantor to limit the consequences of credit risk, the failure of the counterparty or counterparties of the Guarantor may result in losses that could adversely affect the business

of the Guarantor and the Group, its economic results, financial situation and ultimately the Issuer's ability to properly fulfill its obligations under the Bonds.

Liquidity risk

Liquidity risk is the risk that the Guarantor will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Guarantor's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Guarantor's reputation.

Foreign currency risk

The majority of the Guarantor's income, expenses, assets and liabilities are denominated in USD. However, part of the underlying cash flows of the Subsidiaries are denominated in Ukrainian hryvnias. In June 2020, 86% of rental income from the shopping center Piramida owned by the Group, 21% of rental income from the warehouse East Gate Logistic owned by the Group, 37% of rental income from the warehouse West Gate Logistic owned by the Group, 99% of rental income from the business center Eurasia owned by the Group and 99% of rental income from the business center Prime owned by the Group was pegged to USD or EUR (sometimes with Exchange rate corridors or maximal foreign Exchange rate), whereas expenses related to these projects are denominated almost exclusively in Ukrainian hryvnias.

Though the Guarantor attempts to fix its revenues to USD, in the depressed economy it is not always possible to recover in full the effect of Ukrainian hryvnia devaluation. Weakening of the Ukrainian hryvnia could adversely affect the business of the Guarantor and the Group, its economic results, financial situation and ultimately the Issuer's ability to properly fulfill its obligations under the Bond.

Legal risks

The legislative steps taken by the Ukrainian Government in response to the COVID-19 outbreak affect the Group's business

In response to the COVID-19 outbreak, the Parliament of Ukraine adopted a number of laws supporting the tenants during the lockdown period by allowing them to demand a rent reduction from the lessors, provided that the tenants had no objective possibility to use the leased real estate. The rent reduction is not automatic and should be agreed on by the lessor. If the parties fail to agree on reducing the rent, the dispute may be referred to a court for its resolution.

The rent may be reduced for the whole period that the tenants could not use the leased real estate to the full extent due to restrictive quarantine measures. Although it might be treated as unconstitutional, it appears that such provision has a retroactive effect.

Implementation of quarantine measures resulted in governmental restriction, according to which, starting from March 2020 most of the Guarantor's tenants were unable to operate. The Guarantor provided such tenants with rent-free period until the quarantine period is over keeping the reimbursement of utilities and operational expenses. The government started gradual removal of restrictions at the end of May 2020. As of the date of this Prospectus, most of the Guarantor's tenants were able to continue their operational activities.

As a result, the Group experienced decrease in NOI in 1H 2020 by 9.0% year-on-year⁹. In addition to the COVID 19's related restrictions that were imposed by the Ukrainian local authorities in March 2020 this decrease was also driven by the devaluation of Ukrainian hryvnia by 13% in 1H 2020.

The rent, which is subject to reduction under the law, shall be equal to and may not exceed the total amount of the utilities cost, land tax and real estate tax incurred by the lessors. As the Group generates income through leases of its real estate projects, such measurements effectively reduce the income of the Group and if such measurements are prolonged, renewed or hardended, it could negatively affect the Group's business.

The Group's ownership interests or lease rights in land may be challenged

The Group acquired some of its ownership interests and lease rights prior to 1 January 2013. With effect from 1 January 2013, the Ukrainian government modified its state land registration system by introducing the unified State Register of Property Rights to Real Estate. Although the law formally acknowledges titles to property acquired and registered prior to 1 January 2013, such titles are not automatically registered in the

⁹ Based on unaudited data of the Issuer.

State Register of Property Rights to Real Estate. A landowner can apply voluntarily to register its title in the new register. There is a risk that the state registrars or a third party may challenge ownership interests or lease rights in land because of their origin or former registration or for other reasons. This may lead to additional expenses and title risks for the Group. The new system is not yet fully operational with regard to the registration of land lease rights to the land plots in public ownership. Any such challenge could materially adversely affect the Group's business, results of operations, financial condition and prospects.

If the Group's ownership interests or lease rights in land are challenged, its construction projects may be delayed or cancelled

The Group's business includes the acquisition of ownership or lease interests in land plots and buildings in and around Kyiv and other major cities in Ukraine with a view to further development or redevelopment. Ukrainian land and property legislation is complicated and often ambiguous and/or contradictory. In particular, construction approval procedures are complicated and prone to challenge or reversal, and construction and environmental rules often contain requirements that are difficult or even impossible to comply with in practice. As a result, the Group's ownership interests and lease rights to land may be challenged by state or municipal authorities or third parties, which could result in the Group's construction projects being delayed or cancelled or the suspension of operations at completed properties in the future. Any such event could materially adversely affect the Group's business, results of operations, financial condition.

3 Risks Factors Related to Investments in Real Estate

Property risk

Property and property related assets are inherently difficult to value due to the individual nature of each property and the fact there may not be a liquid market or pricing mechanism available. As a result, valuations may be subject to substantial uncertainty. There is no assurance that the estimates resulting from the valuation process will reflect the actual selling price even when such sale occurs shortly after the valuation date. The performance of the Group and the value of its assets would be adversely affected by a downturn in the relevant property market. The market values of and the rental income from properties owned by the Group will generally be affected by the supply and demand for properties, which in turn may be affected by overall conditions in Ukraine, such as growth in GDP, employment trends, inflation and changes in interest rates. Changes in GDP may also impact employment levels and incomes, which in turn may impact the demand for premises.

Both property values and rental income may also be affected by other factors specific to the real estate market, such as (i) competition from other property owners; (ii) covenants, conditions, restrictions and easements relating to properties; (iii) the perceptions of prospective buyers or tenants of the attractiveness, convenience and safety of properties; or acts of nature, such as earthquakes and floods, which may damage properties. The value of the Group's properties may also be affected by the Group's ability to pay for adequate maintenance, insurance and other operating costs, including taxes, which could increase over time. In circumstances in which a member of the Group provides a deposit in respect of a property purchase (or an option to purchase property), the member of the Group may be liable to forfeit such deposit to the extent that it is not able to pay the outstanding balance in relation to the purchase. Any such forfeiture may adversely affect the Group's results of operations, financial condition.

Lack of liquidity in the property market

The property market is affected by many factors, such as general economic conditions, the availability of financing, interest rates and other factors, including investor/buyer supply and demand, which are beyond the Guarantor's control. Investments in real estate are relatively illiquid and are generally more difficult to realise than other investments. The Group cannot predict whether it will be able to sell that property for the price or on the terms set by it, or whether the price or other terms offered by a prospective purchaser would be acceptable to it. Nor can the Group predict the length of time needed to find a willing purchaser and to complete the sale of a property. The Group may be required to expend funds to refurbish or to make

improvements before a property can be sold. The Group cannot be certain that it will have funds available to correct such defects or to make such improvements. This may affect the Group's ability to dispose of or liquidate all or part of its projects in a timely manner and at satisfactory prices in response to changes in the economic or political environment, the real estate market or other conditions which could materially adversely affect the Group's business, results of operations, financial condition and prospects.

Potential environmental liability

Under various laws and regulations and based on available jurisprudence, an owner of property may be liable for the costs of the removal or remediation of certain hazardous or toxic substances on or in such property. Such laws often impose such liability without regard to whether the owner knew of, or was responsible for the presence or removal of, these substances. The owner's liability in relation to any property is generally hard to predict, and could potentially exceed the value of the property and/or the aggregate assets of the owner. These laws typically impose clean-up responsibility and liability on the party that caused the contamination of the site. Even if more than one person may have been responsible for the contamination each person covered by the environmental laws may be held responsible for all of the clean-up costs incurred. In addition, third parties may sue the owner or operator of a site for damages and costs resulting from environmental contamination emanating from that site. The presence of such substances, or the failure to properly remediate contamination from such substances, may adversely affect the owner's ability to sell the real estate or to borrow funds using such property as collateral, which could have an adverse effect on any return from such investment.

Real estate market in Ukraine has been affected by COVID-19

The Group operates in three segments of the real estate market in Ukraine, retail real estate market, office real estate market and warehouse real estate market. Each of these segments has been affected by the COVID-19 outbreak.

Retail real estate market entered lockdown in late March of 2020 with generally solid fundamentals across subsectors. Retail real estate market has been negatively affected the most by the COVID-19 outbreak, with weaker consumption sentiment and a number of non-essential category shops closed from 17 March 2020 due to quarantine, whereas the gradual reopening of shops began taking place from 30 May 2020. Shopping centers felt the most severe impact of lockdown due to closure of non-essential category stores, restaurants, all food & beverage occupiers, entertainment zones and other public venues from 17 March 2020. Most retailers halted their expansion plans or market entry. Strong demand remained only in food, electronics and pharma sectors, while fashion retailers felt the largest drop in sales. COVID-19 outbreak weighed on retail sales and operational results of shopping centers, whereas tenants from non-essential categories of shop received a rent relieve due to closure of their shops or slow recovery of turnover, and many tenants received temporary rental discounts in renegotiations of their leasing terms on individual basis. Future market dynamics will be largely dependent upon the pace of consumer demand recovery and any further measures imposed by the Ukrainian government.

Office and warehouse real estate market sectors remained less susceptible to lockdown effect, however, the general macroeconomic uncertainty and limited business activity had negative implications in terms of slowdown of occupier demand. At the same time, the market conditions before the quarantine with low vacancy and large pent-up demand made the downside pressure on markets less severe.

Office market remained relatively less affected by the lockdown measures, posting solid market fundamentals until late March of 2020 before the onset of the COVID-19 outbreak. Leasing demand lost momentum in the the first 6 months of 2020 due to uncertainty associated with the COVID-19 outbreak. Many corporate occupiers halted their decision on relocations and expansions or reconsidered their current footprint. With lockdown measures being introduced, some tenants started negotiations with property owners on temporary rent reductions. As a result, some occupiers were temporarily granted rent discounts, deferred payments or short-term rent-free periods on individual basis.

Warehouse market suffered the least from quarantine measures. Food retailers and E-commerce continued to operate at full capacity partly counterbalancing the negative impact of lockdown on the market and increasing their requirements for storage. In addition, remarkable deficit of warehouse space being recorded over the course of 5 preceding years made the warehouse market more sustainable to the COVID-19 outbreak. Rental discounts were rare oaproxions, and mostly represented marked-to-market renegotiations for overrented premises. However, due to most rents being denominated in UAH, the market is still imposed to the devaluation risks in case of national currency fluctuations.

As of the date of this Prospectus, the COVID-19 has had no material impact on the vacancy of the real estate projects operated by the Group. However, the Group experienced decrease in NOI¹⁰ in 1H 2020 by 9.0% year-on-year¹¹. Among the COVID'19 related restrictions that were imposed by the Ukrainian local authorities in March 2020 this decrease was also driven by the devaluation of Ukrainian hryvnia by 13% in 1H 2020.

If the COVID-19 outbreak effects become more severe or its effects become prolonged, the lockdown imposed by Ukrainian authorities may be restated and/or other measurements may be imposed, which would further affect the Ukrainian real estate market and he Group's business, results of operations, financial condition and prospects.

4 Risk Factors Related to Ukraine

Civil disturbances, the evolving political situation and military action have negatively impacted and may continue to affect the Group's business, results of operations, financial condition and prospects

The Group operates only in the territory of Ukraine, and all of its assets are located in Ukraine. Ukraine has experienced significant civil disturbances, political instability, military action and territorial losses since 2013. These factors have had and continue to have a negative impact on Ukraine's economy and relations between the Russian Federation and Ukraine.

Following the disputed referendum held in Crimea and the city of Sevastopol and the acceptance of Crimea and the city of Sevastopol into the Russian Federation in March 2014 (referred to herein as the **illegal occupation of Crimea**), geopolitical tensions between Ukraine and the Russian Federation escalated. These and other actions led to disturbances in certain areas of Donetsk and Luhansk regions of Ukraine resulting in military clashes between the Ukrainian armed forces and local militias (supported by Russia). On 18 January 2018, the Ukrainian parliament adopted the law to regain control over the temporarily occupied territories in Donetsk and Luhansk regions, which came into force on 24 February 2018. On 30 April 2018 the President of Ukraine changed the format of military operations in the Donetsk and Luhansk regions of Ukraine from anti-terrorist operation to military operation of the Ukrainian armed forces. On 25 November 2018, Ukrainian Navy vessels attempting to pass from the Black Sea into the Sea of Azov were captured by the Russian Federal Security Service in the Kerch Strait. Following this a period of martial law was introduced in 10 regions of Ukraine for 30 days starting from 26 November 2018. Although the period of martial law ended in December 2018, there can be no assurances that it will not be introduced in the future. The illegal occupation of Crimea has given Russia a strategically important position at the mouth of the Sea of Azov. This strategic position enabled Russia to build a bridge across the Kerch Strait which has strengthened Russian control of the illegally-occupied territory of Crimea as well as strengthening its strategic control of access to the Sea of Azov. Control of the Russian authorities over access to the Kerch Strait has had the practical effect of restricting maritime traffic to and from Ukrainian ports in the Sea of Azov. Ukraine has brought an arbitral claim against Russia with respect to its actions in the Sea of Azov claiming a violation of the UN Convention on the Law of the Sea and the 2003 Treaty between the Russian Federation and Ukraine on cooperation in the use of the Sea of Azov and the Kerch strait.

Further future civil disturbances, political instability, military actions or similar developments in Ukraine could have a material adverse effect on political and economic conditions in Ukraine and, as a result, on the Group's business, results of operations, financial condition and prospects.

The Ukrainian economy has been affected by the COVID-19 outbreak and its deterioration might affect the Group's business, results of operations, financial condition and prospects

After a relatively solid start to 2020 Ukraine faced the negative impact of significant global market turmoil, triggered by the COVID-19 outbreak, which started in late February 2020. Together with other factors, this has resulted in a sharp decrease in the oil price and the stock market indices, as well as a depreciation of the Ukrainian Hryvnia. These developments are further increasing the level of uncertainty in the Ukrainian business environment.

Ukraine's real GDP dropped by 11.4% year-on-year in 2Q 2020¹², reflecting the negative impact of the 2-month long nationwide quarantine and social distancing measures on consumer sectors and household income. The dynamics of real estate sector indicators continued to recover in May-June 2020 after significant deterioration in March-April 2020, as the COVID-19 containment measures remained in force for a part of March, the full month of April and part of May, including a near halt to public transportation, closure of non-essential retail stores, open food markets, hotels and restaurants, entertainment and sports facilities, and individual service providers. However, according to the macroeconomic indicators available on a monthly basis, industrial output slowed its pace of decline to -5.6% year-on-year in June 2020 after bottoming out at -16% in April, bringing the 1H 2020 drop to -8.3%.¹³ Retail turnover began to recover as well following the end of a strict lockdown in May 2020, having risen by 1.4% year-on-year in June after -3.1% in May and -15% in April, bringing the 1H 2020 tally to +3.0% year-on-year,¹⁴ while the Consumer Confidence Index stood at a 2-year low of 65.1 points in June (on a 0-200 scale), erasing its 10-point rebound in May, mostly on worsened economic expectations rather than consumers' assessment of the current situation¹⁵.

Ukrainian Hryvnia plunged by 12% month-on-month to UAH28.2 in exchange for USD in March 2020, driven by the upsurge in demand for foreign currency in response to increased uncertainty and crisis expectations. However, Ukrainian Hryvnia started to recover some of its losses in April 2020 (UAH27.0 in exchange for USD) and remained relatively stable close to that level till the end of 1H 2020, reaching UAH26.7 in exchange for USD at the end of June 2020, and bringing its year-to-date decline to 11%.¹⁶ Headline inflation accelerated to 2.4% year-on-year in June From a multi-year low of 1.7% in May¹⁷, mainly due to the low comparison base in raw food prices last year, but remained low as the impact of Ukrainian Hryvnia devaluation on prices of imported goods was offset by the relatively weak consumer demand.

To support the economy, the Ukrainian Parliament approved an increase in the 2020 budget deficit to 7.5% of GDP, from 2.1% targeted before¹⁸, while the central bank cut its key rate by 750bp year-to-date, to 6.0% p.a. at the end of June 2020.¹⁹

Whilst the Group believes it is taking appropriate measures to support the sustainability of the Group's business in the current circumstances, a continuation of the current unstable business environment could negatively affect the Group's results and financial position in a manner not currently determinable.

5 Risk Factors Related to the Financial Guarantee and the Security

Risk relating to the value of the Security

The value of individual Security assets will depend on market and economic conditions, including the availability of suitable buyers. The Security asset may be illiquid, may not have readily identifiable market value and its value to third parties may be less than its value to the security provider. The value of the Security asset may decrease over time, and any adverse development in the financial performance of the Group will also affect the value of some of the Security assets. As a result, Bondholders may not be fully satisfied in the event of performance of the Security.

Below is a list of values²⁰ of the Group's project serving as a Security as at 31 December 2019 determined by CBRE Ukraine (Expandia LLC): (i) Piramida shopping center – USD50,300,000; (ii) West Gate Logistic warehouse – USD39,800,000; (iii) East Gate Logistic warehouse – USD22,600,000; (iv) Eurasia business center – USD54,300,000; and (v) Prine business center – USD16,800,000.

Absence of application practice

Potential buyers or sellers of the Bonds should be aware that the security of debt claims through a financial guarantee has not yet been tested before Czech courts. It cannot be guaranteed that the court hearing the action of Bondholders against the Guarantor arising from the Financial Guarantee will recognize this Financial Guarantee and to what extent.

Cross - border enforcement

Potential buyers or sellers of the Bonds should be aware that the Financial Guarantee claims procedure will take place before the courts of the Czech Republic, but the Guarantor's assets are located outside the Czech Republic. Any recognition of a decision of a court of the Czech Republic and its subsequent enforcement in a third country would therefore be carried out according to the local legislation, which could affect the success of the enforcement of the claim.

Potential buyers or sellers of the Bonds should also be aware that the security documents relating to the Security are, in certain cases, governed by other than Czech law and similarly the enforcement of such Security may be governed by other than Czech law. This may affect success of the enforcement of the Security.

Limitation of the amount of secured liabilities

The Guarantor's liability under the Financial Guarantee is limited to CZK1,750,000,000. Potential buyers or sellers of the Bonds should therefore be aware that this restriction could have an adverse effect on the satisfaction of the Bondholder under the Financial Guarantee if the Issuer is unable to meet its obligations under the Bonds.

Risk of default under the Financial Guarantee

Potential buyers or sellers of the Bonds should be aware that the Guarantor may not be able to settle all of its debts to the Bondholders arising from the Financial Guarantee if exercising the rights under the Financial Guarantee.

²⁰ Respectively market values. Market value is defined as "the estimated amount for which an asset or liability should Exchange on the valuation date between a willing buyer and a willing seller in arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion".

Commencement of the time limits within which the ineffectiveness of legal acts may be raised

The provision of the Security may result in the commencement of the time limits within which the ineffectiveness of the Security may be argued. These periods start to run from the moment of provision or perfection of the relevant Security. Under the Act No. 182/2006 Coll., on Bankruptcy and Settlement (Insolvency Act), as amended (the **Insolvency Act**), the insolvency administrator may oppose the debtor's legal acts within one year from the date on which the insolvency decision took effect and these legal acts were performed within 1 year to 5 years from the initiation of insolvency proceedings (according to the nature of the objected legal act). If the Security was enforced before the end of the applicable period, this could be declared invalid or ineffective and such Security could not be performed.

Risk that the Junior Creditor will instruct the Security Agent as to the enforcement and method of enforcement of the Security

The intercreditor agreement entered into between the Issuer, J&T BANKA, the Guarantor and J & T PRIVATE EQUITY GROUP LIMITED (the **Intercreditor Agreement**) sets out specific conditions as to who may instruct the Security Agent to enforce the Security (and decide on a method of such enforcement of the Security). As a general rule, the Bondholders are the primary instructing group. However, if the Bondholders would not instruct the Security Agent to act within 40 days from the date when the Bondholders have been asked by J&T BANKA (as a junior creditor under the the loan facility agreement entered into on or before the Issue Date between the Guarantor and J&T BANKA (the **Junior Creditor** and the debt provided thereunder as the **Junior Debt**)) to instruct the Security Agent to enforce the Security, the Junior Creditor may instruct the Security Agent instead of the Bondholders. The conditions contained in the Intercreditor Agreement will be used to the extent described above as long as (at least) any Junior Debt will exist.

Security may secure (pari passu) also other debts of the Issuer and the Guarantor

The Security may secure (pari passu) also other debts than the debts of the Issuer arising from the Bonds and the debts of the Guarantor arising from the Financial Guarantee. Namely, the Security may secure (pari passu) also debts of the Issuer and the Guarantor to the extent anticipated and permitted in the Intercreditor Agreement in connection with any master agreement for financial transactions (or similar agreement under any law, including the Czech Master Agreement or ISDA Master Agreement) entered into in order to hedge against fluctuation of foreign exchange rates and/or interest rates in the form of cross currency swaps, interest rate swaps or financial instruments having similar effect up to the amount corresponding to the anticipated total nominal value of the Issue. Each Security will secure the Issuer's and Guarantor's liabilities up to the amount of CZK5,000,000,000 only. If the aggregate amount of debts of all the secured creditors, ranking pari passu with each other, exceeds such limit, the Bondholders may not be fully satisfied in the event of performance of the Security.

6 Risk Factors Related to the Security Agent

Security is provided for the benefit of the Bondholders, but their rights to Security will be exercised by the Security Agent in its own name

Any Security will be provided to the Bondholders, but the Security Agent will exercise, in its own name, the rights of the Bondholders under the Security. Each Bondholder is in the position of a joint and several creditor with regard to the Security Agent. The Security Agent will thus be the only party to the security documents in addition to the relevant security provider, as a result of which only the Security Agent may claim and exercise any rights under Additional Security. No Bondholder will be authorised to exercise these rights separately.

The legal concept of a security agent was included in the Act No. 190/2004 Coll., on Bonds, as amended (the **Czech Bonds Act**) by its amendment, No. 307/2018 Coll., effective from 4 January 2019. As this is the first enactment of this concept in Czech law, there is currently no decision-making practice of the courts or a

generally accepted legal interpretation available. This legal uncertainty may have a negative impact on the satisfaction of the Bondholders from Additional Security.

Risks related to the appointment or replacement of the Security Agent

The Issuer cannot ensure that, when appointing or replacing a Security Agent, a Security Agent who has sufficient experience in performing the duties of the Security Agent or a similar role is available, although it will proceed in good faith and with due diligence in its selection. This problem is due to the fact that this institute is anchored in the Czech Republic by the latest amendment to the Czech Bonds Act, for which there is no judicial review or market practice. According to the Issuer's experience in dealing with financial institutions in financial markets, this may lead to institutions that normally perform this role in the international capital market not willing to accept the role of the Security Agent.

Failure to select a Security Agent with sufficient experience may result in its potential inability to perform the Security on time or other delays in its activities due to its lack of expertise or experience and may have a negative impact on the satisfaction of Bondholders from the Security, which could be less successful in such a situation, and ultimately Bondholders may derive less benefit from the performance of Security.

7 Risk Factors Related to the Bonds

Risk of default and risk related to the redemption of the Bonds by the Issuer

Much like any other monetary debt, the Bonds are exposed to the risk of default. Under certain circumstances, the Issuer may be unable to pay interest on, or the nominal value of, the Bonds. In case of the redemption of the Bonds by the Issuer on the market, the price paid to the Bondholders for the Bonds may be lower than their original investment and, under certain circumstances, the price may even be zero.

Risk of the interest rate on the Bonds

The holder of a bond with a fixed interest rate is exposed to the risk of a decrease in the price of such a Bond as a result of changes in the market interest rates. While the nominal interest rate is fixed for the term of the existence of the Bonds, the current interest rate on the capital market (**market interest rate**) usually changes daily. As the market interest rate changes, the price of the fixed-rate Bond changes too, but it does so inversely. If the market interest rate increases, the price of the fixed-rate Bond usually drops to a level where the yield of such a Bond roughly equals the market interest rate. On the contrary, if the market interest rate decreases, the price of the fixed-rate Bond usually rises to a level where the yield of such a Bond roughly equals the market interest rate. This fact may have an adverse impact on the value and development of the investment in the Bonds.

Risk of Early Redemption

In case of a full or partial early redemption of the Bonds, including where this takes place without the consent of the particular Bondholder, in accordance with the Terms and Conditions prior to their redemption date, the Bondholder is exposed to the risk of the yield being lower than expected due to such early redemption.

Liquidity risk on the Regulated Market of the PSE

The Issuer will apply for the Bonds to be listed for trading on the Regulated Market of the PSE. Regardless of the listing of the Bonds on a regulated market, there can be no assurance that a sufficiently liquid secondary market in the Bonds will be created or, if it is, that such a secondary market will continue to exist. The fact that the Bonds may be listed on a regulated market may not necessarily lead to the higher liquidity of such Bonds in comparison with the Bonds not listed on a regulated market. Bonds which are not listed on a regulated market may be difficult to value, which may have an adverse impact on their liquidity. On a potentially non-liquid market, the investor may not be able to sell the Bonds at an adequate market price at any time. This fact may have an adverse impact on the value of the investment in the Bonds.

Fees

The overall return on the investment in the Bonds may be affected by the level of fees which are charged by the securities trader or another intermediary of the purchase or sale of the Bonds or by the relevant clearing system used by the investor. Such a person or institution may charge fees for opening and maintaining the investment account, transfers of securities, services associated with the custody of securities, etc. The Issuer therefore recommends the future investors in the Bonds to become familiar with the documents on the basis of which fees will be charged in connection with the Bonds. This fact may have an adverse impact on the value of the Bonds.

Bond purchase lawfulness risk

The prospective buyers of the Bonds (especially foreign persons) should be aware of the fact that the purchase of the Bonds may be subject to legal restrictions affecting the validity of the acquisition. The Issuer has and assumes no liability for the lawfulness of the acquisition of the Bonds by a prospective buyer of the Bonds whether under the laws of the state (jurisdiction) of its establishment or those of the state (jurisdiction) where it operates (if different). The prospective buyer must not rely on the Issuer or any member of the Group in connection with his/her decision-making regarding the lawfulness of the acquisition of the Bonds. If a potential acquirer of the Bonds were to purchase the Bonds in violation of the statutory restrictions applicable to it, it could ultimately invalidate such acquisition and the Issuer would be obliged to return to that acquirer the amount for which that person intended to purchase the Bonds as unjust enrichment. Depending on the laws (jurisdiction) applicable to the person, other legal consequences may be associated with such acquisition of the Bonds in violation of statutory restrictions.

Risk of shortening of the orders of the Bonds

Potential buyers of the Bonds should be aware that the Manager will be entitled to shorten the Bonds' orders at its own discretion, and any overpayment, if any, will be returned to the investor's account without undue delay. In the event of a shortening of the order, the potential investor will not be able to make an investment in the Bonds in the originally intended volume or at all. Therefore, shortening of the order may have a negative effect on the value of the investment in the Bonds.

Risk of different terms and prices for the Bonds in concurrent initial / secondary public offering through the Manager

The terms and conditions of the initial public offering (made by the Issuer through the Manager) and of the secondary public offering (made by the Manager and other selected financial intermediaries), if made concurrently, may differ (including the price and fees charged to the investor). If the investor subscribes/buys Bonds at a higher price (with price meaning the issue price in the initial offering, or the purchase price in a secondary offering), the investor bears the risk that the overall return on the investment will be lower than if the Bonds were subscribed/purchased at a lower price. The price and its total amount may also reflect any fees charged to the investor by the Manager or third parties in connection with the public offering (initial or secondary) and the registration of the Bonds, potentially resulting in different costs the investor may have to incur in order to purchase one Bond from the Manager.

Inflation risk

Prospective investors in the Bonds should be aware that the fair value of the investment in the Bonds may decline as inflation decreases the value of the currency. As the Bonds do not contain an anti-inflation clause, inflation causes a decline in real Bond yields. According to the latest CNB forecast published on 6 August 2020, the year-on-year overall inflation at 2.2% is expected on the monetary policy horizon of the 3rd and 4th quarter of 2020. If, however, a situation occurs where this forecast is not fulfilled and inflation exceeds the level of the nominal yield on the Bonds, the value of the real yield on the Bonds will be negative.

Risk of acceleration of other loans

The Terms and Conditions contain provisions as a result of which the Bonds may be repaid early and the Acceleration associated with the eventual performance of the Security may occur in the event that the Junior Debt becomes prematurely due before its original maturity date other than at the option of the Guarantor or, subject to certain conditions, at the the option of the Junior Debt creditor and is not paid within 10 (ten) Business Days or is not paid when it becomes due and such delay lasts more than 10 (ten) Business Days, unless (in both cases) the Junior Debt ceases to exist in the meantime.

V. SUBSCRIPTION AND SALE

1 General Information about the Offering, the Authorised Person and the Method of Subscription

On the basis of the mandate agreement for the arrangement of the issue of bonds, dated 25 September 2020, as amended (the **Mandate Agreement**), under which the Issuer has mandated J&T IB and Capital Markets, with its registered office at Pobřežní 297/14, 186 00 Prague 8, registered with the Commercial Register kept by the Municipal Court in Prague, File No. B 16661, as arranger (the **Arranger**) with arrangement of the Issue and preparation of the documents related to the Issue. The Issuer has also entered into an agency agreement dated 25 September 2020, under which the Issuer has mandated J&T BANKA with, among other things, the listing of the Bonds for trading at the Regulated Market of the PSE (the **Agency Agreement**). Before the Issue Date, the Issuer will also enter into a subscription agreement under which the Issuer will mandate J&T BANKA with, among other things, public offering and placing the Bonds with the end investors (the **Subscription Agreement**). The Bonds may be offered exclusively through the Manager. The Manager will subscribe for the Bonds from the Issuer and then sell them to the investors as described below. The investors may also subscribe for the Bonds directly from the Issuer.

The Issuer intends to issue the Bonds in the anticipated total nominal value of the Issue of CZK700,000,000 (in words: seven hundred million Czech Koruna) with the possibility to increase the total nominal value up to CZK1,050,000,000 (in words: one billion fifty million Czech Koruna). The Bonds may be issued individually or in tranches, whereas no tranche will be reserved exclusively for the purpose of a public offering in the Slovak Republic (if the Issuer decides to notify the Prospectus (passport) to the NBS). All the Bonds issued as a part of the Issue will be subject to the public offering.

The Manager is committed to make every effort that can be reasonably expected of him to search for the prospective investors in the Bonds and place the Bonds with and sell them to such investors. The offer of the Bonds issued in tranches after the Issue Date will thus be made on the “*best efforts*” basis. Neither the Manager nor any other person in relation to the Issue has undertaken an obligation to subscribe for or purchase any of the Bonds.

This Prospectus has been prepared and published for the purpose of the public offering of the Bonds and for the purpose of admission of the Bonds for trading on the Regulated Market of the PSE.

2 Placement and Offering of the Bonds

The Bonds will be offered by the Issuer through the Manager under a public offering to the domestic and foreign qualified and other than qualified (in particular, retail) investors in the Czech Republic and the Slovak Republic (if the Issuer decides to notify the Prospectus (passport) to the NBS), and to selected qualified investors and other potential investors abroad, subject to the conditions which do not impose the obligation on the offeror to prepare and publish a prospectus in accordance with the laws applicable in that jurisdiction. The public offering of the Bonds by the Manager may last from 1 October 2020 to 30 September 2021 (this date included).

As part of the public offering, the investors will be approached by the Manager, in particular by means of distance communication, and invited to place an order for the purchase of the Bonds (the **Order**), provided that the investor must present a valid identity document in order to participate in the public offering.

In connection with the placement of the Order, the investors must conclude, or have concluded, an agreement with the Manager for purposes such as opening the asset account in the investment instrument register kept by the Central Depository (if they do not already have an opened asset account with a different Central Depository participant) or detailed securities records by the Manager and giving the instruction to arrange the purchase of the Bonds under such an agreement, or they may be invited to present the required documents and identification details by the Manager.

The purchase of the Bonds from the Manager is conditional upon the conclusion of an investment service provision agreement between the investor and the Manager and upon giving the instruction to arrange the purchase of the Bonds under that agreement. As part of the public offering in the Czech Republic, the Manager will receive the instructions through its headquarters in Prague and, in case of the public offering in the Slovak Republic, through its branch J & T BANKA, a.s., pobočka zahraničnej banky, Dvořákovo nábrežie 10, 811 02 Bratislava, Slovak Republic.

The minimum amount for which a single investor is to be entitled to subscribe for the Bonds has not been determined. The maximum amount for which an individual investor is to be entitled to subscribe for the Bonds will be limited by the projected total nominal value of the Issue. If the volume of the Orders exceeds the volume of the Issue, the Manager may reduce the investor's Orders at its discretion (provided that any surplus will be immediately returned in the investor's account). The final nominal value of the Bonds assigned to the individual investor will be stated in the transaction clearing confirmation, which will be delivered to the investor by the Manager without unreasonable delay after the execution of the instruction. The investor may not trade in the subscribed Bonds before this confirmation is delivered.

Investors who subscribe for or purchase the Bonds through the Manager in the Czech Republic, respectively its headquarters in Prague, pay fees associated with acquiring the Bonds according to the Manager's fee list as applicable on the date of the transaction. These costs amount to 0.15% of the transaction volume, but no less than CZK2,000. The standard current fee list of the Manager is published on its website www.jtbank.cz, in the section marked as "*Užitečné informace*", under the subsection "*Sazebník poplatků*" (fee list applicable from 14 September 2020). The investor may be obliged to pay additional fees charged by the intermediary for the purchase or sale of the Bonds, the person keeping the records of the Bonds, the person settling the trade of the Bonds or another person (e.g. fees for the establishment and maintenance of an investment account, for arranging the transfer of the Bonds, services connected with the safekeeping of the Bonds and their records etc.).

An investor who will subscribe for or purchase the Bonds through J&T BANKA in the Slovak Republic will pay the fees in accordance with the current pricelist of the Slovak branch of J&T BANKA applicable on the date of the transaction. On the date of this Prospectus, the fees amount to 0.60% of the transaction volume. If the transaction is settled using an account other than the holder's account, this fee is 1% of the transaction volume and at least EUR480. The current standard pricelist of the Slovak branch of J&T BANKA is published on its website at www.jtbanka.sk in the section marked as "*Užitočné informácie*" under the subsection "*Úrokové sadzby a poplatky*", version *Sadzobník poplatkov časť I - fyzické osoby nepodnikatelia, účinný od 15. 8. 2020* and *Sadzobník poplatkov časť II - právnické osoby a fyzické osoby podnikatelia, účinný od 15. 8. 2020*.

On the relevant settlement date in accordance with the Subscription Agreement, the Bonds will be subscribed for by the Manager against payment of the Issue Price in the manner specified in the Subscription Agreement. On the same day, the Bonds, with the exception of those Bonds which will continue to be held and offered by the Manager, will be sold by the Manager to investors. The total amount of the commission for the subscription and placement of the Bonds will correspond to 2.45% of the total subscribed nominal amount of the Bonds.

The Manager will satisfy the Orders placed by the end investors and it will transfer the relevant bonds in the asset accounts of the individual investors maintained in the relevant records regarding investment instruments. Trading may not start before the notification of the amount allocated to investors. At the same time, the Manager will collect the amount corresponding to the purchase price of the Bonds from the cash accounts of the end investors.

The purchase price of the Bonds issued on the Issue Date will be the same as the Issue Price.

The purchase price of any Bonds issued in tranches after the Issue Date will be determined by the Manager on the basis of the current market conditions and the accrued interest, if any, and it will be published on the website of the Manager www.jtbank.cz in the section *Information duty, Securities issuance* (in Czech original: *Informační povinnost, emise cenných papírů*).

The final results of the public offering, containing also the total nominal amount of all the Bonds that the Issue consists of, will be published on the Issuer's website nupeh-cz.com and on the website of the Manager www.jtbank.cz in the section *Information duty, Securities issuance* (in Czech original: *Informační povinnost, emise cenných papírů*), always immediately after its termination.

3 MiFID II Monitoring of the Creation and Distribution of a Financial Instrument

Target market of eligible counterparties, professional clients and non-professional clients

For the sole purpose of the internal approval process by reviewing the target market in relation to the Bonds, the Manager has assessed that (i) the target market for the Bonds are eligible counterparties, professional clients within the meaning of Directive 2014/65/EU, as amended (the **MiFID II**) as well as non-professional clients from among the clients of the Manager and (ii) when distributing the Bonds in this target market, all distribution channels are selected, through the sales without advisory service, or the portfolio management service.

Any person subsequently offering, selling or recommending the Bonds subject to MiFID II rules is responsible for conducting its own target market analysis in relation to the Bonds (either by adopting or improving a target market assessment) and identifying its own appropriate distribution channels. The Manager and the Issuer are always responsible for determining the target markets and distribution channels only in relation to the primary offer of the Bonds, respectively to the offer made by the Manager himself.

4 Listing

The Issuer will apply for admission of the Bonds for trading on the Regulated Market of the PSE through the Listing Agent and expects the Bonds to be listed on the Issue Date, i.e. 30 October 2020. The estimated amount of fees associated with the listing of the Bonds on the regulated market is CZK50,000 as the listing fee and CZK10,000 as the annual trading fee.

The subscription of the Bonds in the Central Depository can only be settled through a member of the Central Depository.

No person has accepted the obligation to act as a market maker. Neither the Issuer nor the Manager can rule out that the Bonds may become non-tradable on any market(s) and that the Bondholders will thus be unable to sell the Bonds on such a market or on such markets before maturity.

The Issuer is not aware of any regulated markets or third country markets, SME growth markets or multilateral trading facilities where securities of the same class as the Bonds are to be offered to the public or admitted to trading or where such securities are already admitted to trading.

Unless otherwise stated in these Terms and Conditions, capitalised terms have the meanings assigned to them in Condition 17. In these Terms and Conditions, the reference to any provision of law or regulation is a reference to that provision as extended, amended or re-enacted.

1 General Characteristics of the Bonds

1.1 Nominal Value, Form, Anticipated Total Nominal Value of the Issue

The Bonds are being issued as book-entered securities in accordance with the Czech Bonds Act. The nominal amount of each Bond is CZK10,000 (in words: ten thousand Czech Koruna). The anticipated total nominal value of the Issue is CZK700,000,000 (in words: seven hundred million Czech Koruna), with the possibility to increase the total nominal value up to CZK1,050,000,000 (in words: one billion fifty million Czech Koruna).

1.2 Separation of the Right to Interest

There will be no separation of the right to receive interest payable under the Bonds through an issue of coupons as separate securities or otherwise.

1.3 Bondholders

A bondholder is any person on whose owner's securities account (within the meaning of the Capital Market Act) with the Central Depository or in follow-up records linked to the Central Depository a Bond is recorded (the **Bondholder**). Until it has been convincingly proven to the Issuer and the Fiscal and Paying Agent that the crediting to the owner's securities account in the Central Depository or the entry in the follow-up records linked to the Central Depository does not correspond to reality, and that there is another person on whose owner's securities account in the Central Depository or in the follow-up records linked to the Central Depository the Bond should be registered, the Issuer and the Fiscal and Paying Agent will consider each Bondholder as the authorised bondholder in all respects and make payments to that Bondholder in accordance with these Terms and Conditions. Persons on whose owner's securities accounts in the Central Depository or in the follow-up records linked to the Central Depository their Bonds are not registered for any reason, even though such persons should be the Bondholders, are obliged to immediately inform the Issuer and the Fiscal and Paying Agent of this fact and of their ownership title of the Bonds and prove these facts to them in a convincing manner.

1.4 Transfer of the Bonds

The transferability of the Bonds is not restricted.

The transfer of the Bonds will be effective upon the crediting thereof to the owner's securities account with the Central Depository in accordance with the rules and regulations of the Central Depository and applicable law. In the event that the Bonds are recorded in the client's securities account in the Central Depository, the transfer of the Bonds will be effective (i) upon crediting of the transferred Bond to the client's securities

account in accordance with the rules and regulations of the Central Depository and applicable law, and the owner of the client's securities account is obliged to promptly register such transfer in the owner's securities account as of the moment of registration thereof in the client's securities account, or (ii) in the event of any transfer between the Bondholders within one client's securities account, upon the registration of such transfer in the owner's securities account in the follow-up records linked to the Central Depository.

1.5 Rating

As at the Issue Date, the Issuer has not been assigned any rating by any company registered under Regulation (EC) No. 1060/2009 of the European Parliament and of the Council, as amended, or by any other company. No separate rating of the Issue has been made as at the Issue Date, therefore the Issue has no separate rating.

2 Issue Date, Subscription Period, Issue Price, Method and Place of Subscription

2.1 Issue Date, Subscription Period

The Bonds may be issued (i) at once on the Issue Date or (ii) in tranches at any time after the Issue Date until 30 September 2021 (including). If, upon agreement with the Manager, the Issuer decides to issue Bonds in a higher total nominal value than the anticipated total nominal value of the Issue, the total nominal value of all the issued Bonds must not exceed CZK1,050,000,000 (in words: one billion fifty million Czech Koruna). The subscription period will start on 30 October 2020 and end on 30 September 2021 (inclusive).

The Issuer will notify the Bondholders of the total nominal value of all Bonds issued after their issue and at the latest immediately after the end of the subscription period. Such notifications will be made in the manner as specified in Condition 15.1 without undue delay.

2.2 Issue Price

The issue price (the **Issue Price**) of all Bonds issued as of the Issue Date is 100%.

The Issue Price of any Bonds issued after the Issue Date will be determined by the Manager on the basis of the current market conditions. Where relevant, a corresponding accrued interest will be added to the amount of the Issue Price of any Bonds issued after the Issue Date. For the avoidance of doubt, the Manager does not have any obligation to any Bond investor to buy back any Bonds.

2.3 Method and Place of Subscription

Further information on the method and place of subscription for Bonds is stated in the Prospectus (see section *Subscription and Sale*).

3 Status of the Bonds

3.1 Ranking

The Bonds constitute direct, general, unconditional and unsubordinated liabilities of the Issuer secured by the Financial Guarantee (as defined in Condition 3.3) and Security (as defined in Condition 3.5) which rank and will rank *pari passu* among themselves and at least *pari passu* with any present and future unsubordinated and in the same or similar manner secured liabilities of the Issuer, with the exception of liabilities treated preferentially under applicable mandatory laws. Under the same conditions, the Issuer must treat all Bondholders equally.

3.2 No Pre-emptive or Priority Rights

Neither the shareholders of the Issuer nor any other person has any right of first refusal, pre-emptive or conversion rights in relation to the Bonds or any other priority subscription rights in relation to the Bonds.

3.3 Financial Guarantee

The liabilities of the Issuer under the Bonds are unconditionally and irrevocably secured by a financial guarantee (the **Financial Guarantee**) constituted by a financial guarantee deed (the **Financial Guarantee Deed**) within the meaning of Section 2029 *et seq.* of Act No. 89/2012 Coll., the Czech Civil Code, as amended (the **Civil Code**) granted by the Guarantor, which is available for inspection to the Bondholders during regular business hours at the Specified Office as set out in Condition 12.1.1 and the wording of which is also included in the Prospectus. The exercise of the right of the Bondholders to require the repayment of the Issuer's debts arising from the Bonds from the Guarantor is independent of the enforcement of the Security (as defined in Condition 3.5) by the Security Agent.

3.4 Security Agent

The Security Agent exercises the rights of the creditor and the pledgee or the recipient of other security, including the rights arising from or related to the Security Documents and the Intercreditor Agreement (as these terms are defined in Condition 3.5), in its own name for the benefit of the Bondholders, also in the event of insolvency proceedings, enforcement of a decision or distraintment concerning the Pledgor and the Issuer. The relationship between the Issuer and the Security Agent is governed by the Security Agent Appointment Agreement and the Intercreditor Agreement (as defined in Condition 3.5).

The funds obtained under the Security that the Security Agent receives, among other things, in accordance with the Intercreditor Agreement (as defined in Condition 3.5) belong to the Bondholders (proportionately to the number of the Bonds held by them) and the Security Agent as provided for in these Terms and Conditions, whereas in accordance with Section 20(2) of the Czech Bonds Act, such funds are considered to be the customer's property under the Capital Market Act. In exercising the rights under the Security, the Security Documents, the Security Agent Appointment Agreement, the Intercreditor Agreement and the Terms and Conditions and other rights under the Czech Bonds Act relating to the Security, the Security Agent is considered to be the creditor of each secured receivable in accordance with Section 20a(6) of the Czech Bonds Act. To the extent that such rights (including those referred to in Section 20a(5) of the Czech Bonds Act) are exercised by the Security Agent, no Bondholder is entitled to exercise such rights separately. In cases where the Security Agent is in delay with the exercise of the applicable rights or the performance of its duties for more than 40 days, this constitutes a reason for which the Security Agent may be dismissed under the Security Agent Appointment Agreement and the Issuer is obliged to convene a Meeting on this event under Condition 13.1.2.

Essential documents relating to the Security, including the Security Documents, the Security Agent Appointment Agreement and the Intercreditor Agreement, will be available for inspection to the Bondholders or investors in the Bonds prior to subscription for or purchase of the Bonds during regular business hours at the Specified Office as set out in Condition 12.1.1.

By subscribing for or purchasing the Bonds, each Bondholder agrees to the appointment of the Security Agent as a security agent under Section 20 *et seq.* of the Czech Bonds Act. Each Bondholder further agrees that the Security Agent may, in its name and on behalf of the Bondholders, exercise all rights of a creditor, pledgee or recipient of any other security arising from the Security, the Security Documents, the Intercreditor Agreement, the Terms and Conditions, the Security Agent Appointment Agreement and the Czech Bonds Act or other applicable legislation under the terms and conditions set forth therein.

The Security Agent agrees to its appointment as a security agent and other authorisations under the Terms and Conditions, the Intercreditor Agreement and Section 20 *et seq.* of the Czech Bonds Act in connection with the Bonds and the Security contained in the Security Agent Appointment Agreement and the Security Documents. The Security Agent Appointment Agreement, the Security Documents and the Intercreditor Agreement may include additional details regarding the rights and obligations of the Security Agent, including, where applicable, the enforcement of the Security for the benefit of the Bondholders and the Security Agent.

3.5 Establishment and Maintenance of the Security and Procedures in the Event of the Issuer's Default in Connection with the Security

The Issuer shall ensure, under the conditions specified in Condition 4.13, that the liabilities of the Issuer arising from the Bonds and the liabilities of the Guarantor arising from the Financial Guarantee are secured by a Security (as defined below) established in favour of the Bondholders, and the Security Agent, respectively, under the following pledge or other security agreements concluded between the Security Agent as a pledgee and the relevant pledgor or other security provider (the **Pledgor**):

The Security Agent exercises the rights and obligations contained in these Terms and Conditions, the Security Documents, the Intercreditor Agreement, the Security Agent Appointment Agreement and Section 20 and following of the Czech Bonds Act, always in accordance with and under the conditions specified in the Intercreditor Agreement. In accordance with Section 20a(8) of the Czech Bonds Act, the provisions of the Civil Code on the management of someone else's assets will not apply to the activities of the Security Agent. The Security Agent is not obliged to review the accuracy of any documents or any calculations made by the Issuer or the Guarantor or the Chosen Auditor under these Terms and Conditions.

In the event there are any reasons for the termination of the activities of the Security Agent under the Security Agent Appointment Agreement or any other reasons under the Czech Bonds Act, including Section 21(1)(c), the Issuer is obliged to convene a Meeting (as defined below) without undue delay in accordance with Condition 13.1.2 to decide on the appointment of a new security agent (the **New Security Agent**). In the event the Issuer does not convene a Meeting, the Security Agent is obliged to convene the Meeting without undue delay and at the Issuer's expense in accordance with Condition 13.1.1. If the Meeting is not convened by either the Issuer or the Security Agent, any Bondholder is authorised to convene the Meeting in accordance with Condition 13.1.1.

The rights and obligations arising from the Security, the Security Documents, these Terms and Conditions and the Security Agent Appointment Agreement pursuant to Section 20(6) of the Czech Bonds Act will automatically be transferred to the New Security Agent and, to the extent the Intercreditor Agreement so permits, the rights and obligations under the Intercreditor Agreement will also contractually pass to the New Security Agent, with effect as of the date on which the Meeting adopted the decision to appoint the New Security Agent, unless a later date is specified in the Meeting's decision. The procedure for changing the Security Agent is further specified in the Security Agent Appointment Agreement and the Intercreditor Agreement. However, the transfer of rights and obligations to the New Security Agent (and the transfer under the Intercreditor Agreement) will not take place before the New Security Agent has consented to its appointment as a security agent in respect of the Bonds. No obligations of the Security Agent arising from a breach of its obligations as a security agent or any liabilities related to the office of the Security Agent that originated before the effective date of appointment of the New Security Agent will be transferred to the New Security Agent. The Issuer will notify the Bondholders of the appointment of the New Security Agent in the manner specified in Condition 15.1 of these Terms and Conditions.

3.7 Actions of the Security Agent

(a) The Security Agent

- (i) is obliged, subject to paragraph (d) below, to exercise any right or refrain from exercising any right which it has as the Security Agent, in accordance with any instruction approved by the Meeting by a Simple Majority (the **Meeting Instruction**); and
- (ii) is not responsible for any action (or omission) if it acts (or refrains from acting) in accordance with the Meeting Instruction or the Intercreditor Agreement.

(b) Instruction clarification

The Security Agent is entitled to request

- (i) convening a Meeting to issue a Meeting Instruction or to specify the decisions under previous Meeting Instructions, or,
- (ii) if the statutory conditions for making a decision on matters that were not included in the proposed agenda of the Meeting are fulfilled, a Meeting Instruction or specifying the Meeting Instruction directly within the Meeting,

as to whether and how it should exercise any right or refrain from exercising any right or authority, and the Security Agent may refrain from acting until it receives such a Meeting Instruction or specification, unless such exercise or refraining from exercising that right is not possible due to a conflict with the terms of the Intercreditor Agreement or due to lack of consent to such exercise or refraining under the terms of the Intercreditor Agreement. This is without prejudice to the right, and not the obligation, of the Security Agent to exercise any right or refrain from exercising any right or authority if the delay in the opinion of the Security Agent could cause serious damage to the Bondholders and such action or refraining is not contrary to the terms of the Intercreditor Agreement, i.e. the Security Agent does not lack the necessary consent thereunder.

(c) Binding nature of instructions

Any Meeting Instructions will be binding on all Bondholders.

(d) In the exercise of any right of the Security Agent under the Security Documents or any related right, including the exercise of the creditor's rights under Section 20a(5) of the Czech Bonds Act, where:

- (i) the Security Agent has not received any instruction regarding the exercise of that right; or
- (ii) in the opinion of the Security Agent, the Meeting Instruction is in violation of law or good morals,

the Security Agent will act at its discretion, taking into account the interests of all Bondholders and ensuring compliance of such conduct with the terms of the Intercreditor Agreement.

(e) The Security Agent may require that it is in connection with the Meeting Instruction provided with sufficient security or promised indemnification by the Meeting or the Issuer (in the opinion of the Security Agent to a sufficient extent) in the event of any material or non-material damage.

Without prejudice to the provisions of Condition 3.10 or other provisions of this Condition 3.7, in the absence of any Meeting Instructions the Security Agent may act (or refrain from acting) as it deems appropriate, but always in the best interest of the Bondholders and in accordance with the Intercreditor Agreement.

3.8 Conclusion of the Intercreditor Agreement by the Security Agent

The Bondholders authorise the Security Agent to enter into the Intercreditor Agreement and acknowledge that the Security Agent may enter into any amendment to the Intercreditor Agreement that would (i) not have a negative impact on the Bondholders, (ii) be approved by the Meeting or (iii) be necessary to protect the rights of the Bondholders.

The Bondholders acknowledge that the Intercreditor Agreement aims to regulate the conditions for the performance or exercise of the applicable rights or performance of obligations under the Security or the Security Documents or other rights or obligations of the Security Agent set out in the Intercreditor Agreement by the Security Agent, as well as the procedure of the Security Agent in performing the Security and the use of any proceeds from the Security. The Bondholders further acknowledge that the Intercreditor Agreement may set out conditions or restrictions on the immediate exercise of the Security for the benefit of the Bondholders or the Security Agent, whereas such conditions do not in any way restrict the obligations of the Security Agent to follow the respective Meeting Instructions (for detailed information see "*Risk that the Junior Creditor will instruct the Security Agent as to the enforcement and method of enforcement of the Security*" in Chapter II (*Risk Factors*)). The Intercreditor Agreement will be used to the extent described above as long as (at least) any Junior Debt will exist.

3.9 Acceleration

If an Event of Default (as defined in Condition 9.1) occurs and is continuing, the Security Agent may, if it is in its opinion necessary to protect the Security, decide that all liabilities from the Bonds, including any unpaid

accrued interest or other yield on these Bonds in accordance with Condition 5.1, become due and payable (the **Acceleration**), whereas the Security Agent must decide on the Acceleration always in the following cases:

- (a) if the Bondholders holding at least 30 % of all issued and outstanding Bonds delivered Early Redemption Notice to the Fiscal and Paying Agent in accordance with Condition 9.1 and their receivables from the Issuer arising from the Bonds remain unpaid, or
- (b) if an Event of Default occurs in accordance with Condition 9.1(c), (f)(i), (f)(ii), (f)(iv), (g) or (i) and such Event of Default is continuing, or
- (c) if the Meeting so decides by a Simple Majority.

If the Acceleration occurs, all amounts payable by the Issuer to the Bondholders shall become payable (unless they have become payable earlier) on the last Business Day of the month following the month in which the Security Agent decided on the Acceleration (the **Early Redemption Date of the Bonds**) and announced this fact to the Issuer in accordance with Condition 15.3 and the Bondholders in accordance with Condition 15.2. In accordance with Condition 3.10, the Meeting may at the same time combine the decision on Acceleration with the Enforcement Decision (as defined in Article 3.10), whereas the decision on Acceleration must be always accepted before the Enforcement Decision and in relation to both of these decisions, the corresponding majorities apply.

3.10 Enforcement of the Security and Other Decisions

Pursuant to Section 20a(7) of the Czech Bonds Act, the Bondholders will not have any direct rights under the Security Documents and will not be able to exercise any separate authorisation, right or remedy regarding any Security or grant consent or waive the right to the Security or make any direct use of any Security if such rights are exercised by the Security Agent. None of the Bondholders will be entitled to ask the Security Agent independently to act in any way in relation to the Security.

In the event of the Acceleration, the Security Agent may, at its discretion, acting in good faith and with due care, select the appropriate mode of enforcement or other appropriate conduct under applicable regulations in relation to the Security in accordance with the terms of the Security Document. Before the Security Agent commences the enforcement of the Security, the Security Agent must convene a Meeting at the Issuer's expense in accordance with Condition 13.1.1 of the Terms and Conditions. The Meeting will decide whether the Security Agent is to commence the enforcement of the Security or take other steps in relation to the Security or the procedures set out in the Intercreditor Agreement (the **Enforcement Decision**). The Enforcement Decision must be approved by a Simple Majority and must contain the manner of enforcement of the Security in accordance with the Security Documents and the applicable regulations. The Enforcement Decision is binding on the Security Agent and all Bondholders. The Meeting may combine the Enforcement Decision with the decision on the Acceleration.

The Security Agent will start to proceed in accordance with the Enforcement Decision without undue delay after the Enforcement Decision has been delivered to it, however will effectively not complete such procedure earlier than after expiration of thirty (30) Business Days following any decision on Acceleration under these Terms and Conditions. The Security Agent will inform the Bondholders about the status of the enforcement of the Security in the manner set out in Condition 15.2 and documents related to the enforcement of the Security will be available for inspection by the Bondholders during regular business hours at the Specified Office as set out in Condition 12.1.1.

3.11 Use of Proceeds

The Security Agent will use (and is obliged to proceed thus under the Security Agent Appointment Agreement, unless the Intercreditor Agreement stipulates otherwise) any proceeds from the Security that it receives, among other things, in accordance with the Intercreditor Agreement, as follows:

- (a) first, to cover all payments due to the Security Agent in connection with the performance of its office (excluding the Security Agent's remuneration), including any costs and expenses related to the enforcement of the Security, unless such payments have been made otherwise;
- (b) second, to pay the Security Agent's remuneration up to a maximum of 4.00% of the proceeds from the enforcement of the Security;
- (c) third, to pay the proportionate amount of any indemnification paid to the Security Agent by the Bondholders;
- (d) fourth, to pay the proportionate amount of any (i) due and outstanding principal of, and due and outstanding interest on, the Bonds to the Bondholders and (ii) payment due to the Hedging Counterparty under the Hedging;
- (e) fifth, to pay the proportionate amount of any payment due in accordance with the Intercreditor Agreement; and
- (f) sixth, to refund any surplus to the relevant Pledgor.

The principal and interest accrued on the Bonds under paragraph (d) above will be paid by the Security Agent through the Fiscal and Paying Agent. The Security Agent will inform the Bondholders of the distribution of these proceeds among the Bondholders in the manner set out in Condition 15.2. In the case of enforcement of the Security as part of the Issuer's insolvency proceedings, the rules for the distribution of the proceeds from the realisation of the Security will be adjusted in accordance with the statutory conditions.

4 Obligations of the Issuer

4.1 Obligation to not Create a Security

So long as any of its liabilities from the Bonds remain outstanding, the Issuer will not, and will ensure that the Guarantor or any of its Subsidiaries will not, create, or enable the creation of, any Other Security of the Indebtedness that would fully or partially restrict the Issuer's, the Guarantor's or any of its Subsidiaries' rights to its current or future assets or income, unless, at the same time or prior to the creation of the Security, it ensures that (i) the Other Security (excluding assets secured by the Security) is created as second in rank after debts from the Bonds and debts from the Financial Guarantee or, provided that such creditors accede at the same time to the Intercreditor Agreement (and in the case of the Junior Debt) created otherwise with ranking after debts from the Bonds and debts from the Financial Guarantee, or secured by such other security as may be approved by the Meeting's resolution; or (ii) the creation of the Other Security is approved by the Meeting by a Simple Majority in accordance with Condition 13.

The Issuer undertakes and will ensure that, as long as any of its liabilities from the Bonds remain outstanding, the Loan to Value Ratio (as defined below) in relation to the Group will not exceed 40.00 %.

Promptly after the Issuer has learned that the Loan to Value Ratio has been exceeded, the Issuer must notify such fact to the Fiscal and Paying Agent, the Security Agent and the Bondholders. Within 30 days after the Issuer has duly notified such fact pursuant to the preceding sentence, the Ultimate Controlling Person (or any of them) or any of its Subsidiaries may carry out or ensure rectification of the Loan to Value Ratio by (i) increasing the Guarantor's registered capital (with the issuance of shares), (ii) providing a contribution outside the Guarantor's registered capital or (iii) providing subordinated debt in relation to the Bonds (the **Rectification**), whereas in the case of points (ii) and (iii), such person has to at the same time accede to the Intercreditor Agreement or otherwise subordinate such debt. After each Rectification, the Issuer is obliged, without undue delay and no later than 30 days from the day on which it became aware of the breach and notified it to the Fiscal and Paying Agent and the Security Agent to prove rectification of the Loan to Value Ratio to the Fiscal and Paying Agent and the Security Agent, and publish it in the manner set out in Condition 15.1, together with a confirmation issued by persons authorised to act on behalf of the Issuer and the Guarantor to the effect that the Loan to Value Ratio, after the Rectification, comply with the level set out in this Condition; in the confirmation, when determining the Loan to Value Ratio, the Issuer will take into account the Rectification by adding the funds received to the relevant accounting data (and reflect this in the calculation of the Net Indebtedness). The Issuer will not be in breach of this Condition 4.2, if the Rectification is made within the time limits set out therein.

4.3 Indebtedness

The Issuer undertakes and will ensure that, so long as any of its liabilities from the Bonds remain outstanding, the Indebtedness will not increase and no new Indebtedness of the Issuer, the Guarantor or any of its Subsidiaries will be created.

The restriction under this Condition 4.3 does not apply to any (i) Indebtedness that is created by operation of law or under a judicial or administrative decision against the Issuer, the Guarantor or any of its Subsidiaries, if in the judicial or administrative proceedings leading to the issuance of the judicial or administrative decision the Issuer, the Guarantor or any of its Subsidiaries acted actively and protected its interests in good faith, (ii) Indebtedness during the creation of which there are refinanced, prepaid or duly paid all of the liabilities from the Bond by the Issuer; (iii) Indebtedness of a Group Member towards another Group Member, provided that 100 % shares or participation (as applicable) of both Group Members are subject to the Security or such a Group Member is the Guarantor; (iv) Indebtedness of the Issuer in connection with any derivative transaction entered into in connection with the hedging against the fluctuation of a rate or currency (but not for speculative purposes); (v) Indebtedness of the Issuer, the Guarantor or any of its Subsidiaries in the form of a subordinated loan or subordinated borrowing, provided that such creditors accede at the same time to the Intercreditor Agreement; (vi) the Junior Debt; (vii) Indebtedness of the Guarantor permitted in the Condition 4.2; and (viii) any Indebtedness not falling within the above paragraphs, the aggregate outstanding principal amount of which across the Group does not at any time exceed USD500,000.00 (or its CZK equivalent).

4.5 Disposal of Assets

4.5.1 Restrictions on Disposals of Assets

The Issuer undertakes and ensures that neither it nor the Guarantor or any of its Subsidiaries, before the repayment of all its liabilities under the Bonds in full, sells, invests in the registered or other capital of another company (save for the Group Member), leases (other than in connection with their ordinary course of business), transfers or otherwise disposes of its assets (including any intragroup receivables) in the value of at least CZK23,000,000 within one or more transactions (save for establishment and creation of any security, pledge, mortgage and assignment in relation to the Junior Debt) (the **Disposal**); related Disposals, especially if they are carried out in a single transaction, are counted as one Disposal for the purposes of the limit set out below.

The Issuer, the Guarantor or any of its Subsidiary may execute the Disposal, unless the asset in question is subject to the Security or Other Security securing the Bonds, if (i) the transaction is executed on an arm's length basis, (ii) the transaction is paid in cash or, if the transaction is not fully paid in cash and if the total value of the transaction reaches during a financial year at least CZK46,000,000, then within 10 Business Days after the Disposal is executed, the Issuer must publish and make available to the Bondholders in the manner set out in Condition 15.1 an opinion prepared by the Chosen Auditor or an independent expert determining the value of performance and consideration in the transaction, together with a confirmation that the transaction was executed on an arm's length basis, (iii) the Distribution Loan to Value Ratio is not exceeded as a result of the Disposal, and (iv) there is no Event of Default and no Event of Default is threatened or on-going as a result of that Disposal.

The restrictions under Conditions 4.5.1 and 4.5.2 do not apply to any Disposal between the Issuer, the Guarantor and its Subsidiaries or among such Subsidiaries, provided that (i) 100 % shares or participation (as applicable) of such Group Members are subject to the Security or such a Group Member is the Guarantor, (ii) such Disposals do not have any adverse effect on the validity or enforceability of the Security and (iii) that all necessary actions for maintaining and/or retaking the Security are taken.

The first payment of interest will be made as of 30 April 2021.

The Bonds will cease to bear interest on the Final Maturity Date of the Bonds or the Early Redemption Date of the Bonds, unless the payment of any due amount is unlawfully retained or refused by the Issuer although all relevant conditions and requirements for payment of the due amount have been complied with. In such an

event, interest will continue to accrue at the interest rate set out in Condition 5.1 until the earlier of (i) the date on which all amounts due and payable as of that date in accordance with these Terms and Conditions are paid to the Bondholders or (ii) the date on which the Fiscal and Paying Agent notifies the Bondholders that it has received all amounts payable in connection with the Bonds, unless any additional unlawful retention or refusal of payments occurs after such a notification.

The total interest amount and any other amount payable under these Terms and Conditions pertaining to one Bond and calculated according to this Condition 5.4 will be rounded by the Fiscal and Paying Agent to two decimal places using mathematical rules and, without undue delay, will be notified to the Bondholders in accordance with Condition 15.1.

6 Redemption and Purchase of the Bonds

6.4 Early Redemption at the Option of the Issuer

The Issuer may only partially redeem the Bonds on the Early Redemption Date of the Bonds that is an Interest Payment Date. The Issuer shall repay all or part of the outstanding nominal amount of the Bonds, the relevant interest income accruing to the amount of the early repaid nominal amount of the Bonds as of the Early Redemption Date of the Bonds and the extraordinary interest income specified in this Condition 6.4 below.

If the early redemption at the option of the Issuer occurs between:

- (b) the first anniversary of the Issue Date (exclusive) and the second anniversary of the Issue Date (inclusive), the extraordinary interest income will amount to 2.00% of the total amount of the early (partial or full) repaid nominal amount of all Bonds;
- (c) the second anniversary of the Issue Date (exclusive) and the third anniversary of the Issue Date (inclusive), the extraordinary interest income will amount to 1.00% of the total amount of the early (partial or full) repaid nominal amount of all Bonds;
- (d) the third anniversary of the Issue Date (exclusive) and the fourth anniversary of the Issue Date (inclusive), the extraordinary interest income will amount to 0.50% of the total amount of the early (partial or full) repaid nominal amount of all Bonds; and
- (e) the fourth anniversary of the Issue Date (exclusive) and the fifth anniversary of the Issue Date (exclusive), there will be no payment of an extraordinary interest income.

The early redemption notice at the option of the Issuer under this Condition 6.4 is irrevocable and obliges the Issuer to redeem the Bonds early in accordance with the provisions of this Condition 6.4.

Provisions of Condition 7 with the necessary modifications will otherwise apply to the early redemption of the Bonds under this Condition 6.4.

6.5 Buy-out of the Bonds by the Junior Debt creditors

In this context, the Fiscal and Paying Agent will provide the Security Agent with all necessary assistance.

The Security Agent shall notify the Bondholders of the receipt of the notice in accordance with the preceding paragraph, together with information on the relevant Transfer Date in accordance with Condition 15.2.

By subscribing for or purchasing the Bonds, each Bondholder agrees to the terms of the buy-out of the Bonds under this Condition 6.5 and authorizes the Security Agent to transfer the Bonds on behalf of the relevant Bondholder to the relevant Junior Debt creditor in accordance with the first paragraph of this Condition and, if required by the Security Agent, each Bondholder shall grant the Security Agent a special power of attorney authorizing the Security Agent to make such transfer.

Provisions of Condition 7 with the necessary modifications will otherwise apply to the buy-out of the Bonds under this Condition 6.5, whereas the individual steps in connection with the settlement of the buy-out of the Bonds will be taken by the Fiscal and Paying Agent.

6.6 Presumption of Redemption

All the Issuer's liabilities from the Bonds will be considered fully satisfied on the day when the Issuer pays to the Fiscal and Paying Agent all the amounts of the nominal amount of the Bonds and accrued interest (where relevant) payable under Conditions 6, 9 and 13.4.1.

7 Payment Terms

7.1 Currency of Payments

The Issuer undertakes to pay interest on, and repay the nominal amount of, the Bonds solely in the Czech Koruna (CZK), or in any other lawful currency of the Czech Republic that may replace the Czech Koruna.

Interest will be paid to the Bondholders and the nominal amount of the Bonds will be repaid to the Bondholders subject to and in accordance with these Terms and Conditions and the tax, foreign exchange and other applicable laws of the Czech Republic in effect at the time of the relevant payment.

In the event that the Czech Koruna in which the Bonds are denominated and in which the payments relating to the Bonds should be made in compliance with these Terms and Conditions ceases to exist and is replaced by the Euro (EUR), (i) the denomination of the Bonds will be changed to the Euro in conformity with the applicable laws, and (ii) all monetary liabilities arising from the Bonds will automatically and without any further notice to the Bondholders be payable in the Euro, with the official rate (i.e. the fixed conversion ratio) being in accordance with the applicable law being used as the exchange rate between the Czech Koruna and the Euro. Such replacement of the Czech Koruna (i) will not, in any respect, affect the existence or enforceability of the Issuer's liabilities under the Bonds, and (ii) for the avoidance of doubt, will not be deemed to constitute any change of the Terms and Conditions or any Event of Default under these Terms and Conditions.

7.2 Payment Date

The payment of interest on, and the repayment of the nominal amount of, the Bonds will be made by the Issuer through the Fiscal and Paying Agent on the dates specified in these Terms and Conditions, i.e. according to its meaning, as of the Interest Payment Date or the Final Maturity Date of the Bonds or the Early Redemption Date of the Bonds (each of these dates also as the **Payment Date**).

7.3 Business Day Convention

If any Payment Date falls on a day that is not a Business Day, such Payment Date will instead fall on the next following Business Day, and the Issuer will not be obliged to pay any interest or any other additional charges by reason of such delay in payment resulting from the application of any Business Day convention.

7.4 Determination of the Right to Receive Payments Related to the Bonds

Authorised Persons to whom the Issuer will pay interest on the Bonds or the nominal amount of the Bonds are the persons in whose owner's securities accounts in the Central Depository or records of the person keeping the follow-up records linked to the Central Depository the Bonds are registered at the end of the relevant Record Date for Payment, unless it is convincingly proven to the Issuer and the Fiscal and Paying Agent, no later than 5 (five) Business Days before the relevant Payment Date, that the entry in the owner's securities account in the Central Depository or the follow-up records linked to the Central Depository does not correspond to reality and that there is another person or persons in whose owner's securities accounts in the Central Depository or the follow-up records linked to the Central Depository the Bonds should have been registered at the end of the relevant Record Date for Payment. In such a case, the Issuer will pay interest on the Bonds or the nominal amount of the Bonds to such person or persons (the **Authorised Persons**).

For the purposes of determining the recipient of the interest on the Bonds or the nominal amount of the Bonds, neither the Issuer nor the Fiscal and Paying Agent will take into account any transfer of any Bonds registered in the Central Depository or in the follow-up records linked to the Central Depository after the Record Date for Payment.

Unless it is contrary to the valid legal regulations, transfers of the Bonds may be suspended for the purposes of payment of the nominal amount of the Bonds beginning on the day immediately following the Record Date for Payment until the relevant Payment Date.

If, according to the entry in the owner's securities account kept with the Central Depository, or in the register maintained by a person keeping follow-up records linked to the Central Depository, the Bonds with respect to which the payments of interest or any other amounts will be performed by the Fiscal and Paying Agent are pledged, then the pledgee, recorded in the extract from the register of the Issue, will be considered an Authorised Person in respect of the Bonds, unless (i) it is evident that the person authorised to receive the

payments of interest or any other amounts attached to the pledged Bonds is the respective Bondholder and/or (ii) it is proven to the Fiscal and Paying Agent in other satisfactory manner that the respective Bondholder has the right to receive the payments of interest or any other amounts attached to the pledged Bonds by virtue of an agreement between such Bondholder and the pledgee.

If an Authorised Person requests for the payment to be made through a proxy, the Fiscal and Paying Agent shall make the payment only upon presentation of an original or officially certified copy of the power of attorney and the signature of such Authorised Person on the power of attorney must be officially legalised, unless otherwise provided under generally binding law provisions. Documents issued abroad must be superlegalised or apostilled, unless otherwise provided under an international treaty binding on the Czech Republic.

Any documents produced by the Authorised Persons or the Issuer to the Fiscal and Paying Agent in connection with payments to Authorised Persons must be in the Czech or English language or translated into Czech or English language by a sworn translator, unless otherwise stipulated in these Terms and Conditions or unless otherwise agreed with the consent of the Fiscal and Paying Agent.

7.5 Payments

The Fiscal and Paying Agent will make payments in connection with the Bonds to the Authorised Persons by means of wire transfer to their accounts kept with a bank in a Member State of the European Union or other state that is a member of the European Economic Area, according to an instruction communicated by the Authorised Person to the Fiscal and Paying Agent to the address of the Specified Office in a verifiable manner no less than 5 (five) Business Days prior to the Payment Date.

Such instruction shall be in the form of a written statement with an officially verified signature or signatures or a signature verified by an authorised employee of the Fiscal and Paying Agent, and shall contain sufficient details of such bank account to allow the Fiscal and Paying Agent to make the payment, and, if the Authorised Person is a legal entity, it shall be accompanied by an original or an officially certified copy of an extract from the Commercial Register or other respective register in which the Authorised Person is registered not older than six months and the authorized employee of the Fiscal and Paying Agent will verify the validity of the information contained in such extract from the Commercial Register or other respective register (such instruction, excerpt from the Commercial Register or other respective register and certificate of tax domicile, and other required appendices, if any (the **Instruction**)).

The Instruction must be in accordance with the specific requirements of the Fiscal and Paying Agent in terms of content, form and confirmation of the authorisation to sign the Instruction on behalf of the Authorised Person, e.g. the Fiscal and Paying Agent is entitled to request (i) submission of a power of attorney including an officially certified translation into Czech or (ii) additional confirmation of the Instruction from the Authorised Person. Notwithstanding the foregoing, neither the Fiscal and Paying Agent nor the Issuer will be obliged to examine the correctness, completeness or authenticity of any such Instruction in any manner whatsoever and neither of them will be liable for any damage incurred in connection with any delay in the delivery of such Instruction by the Authorised Person or with the delivery of an incorrect or otherwise defective Instruction. The Instruction will be deemed properly made if it contains all the items required by this Condition and is delivered to the Fiscal and Paying Agent in accordance with this Condition.

The Instruction will be considered duly delivered if it has been delivered to the Fiscal and Paying Agent at least 5 (five) Business Days before the Payment Date.

Any Authorised Person claiming a tax benefit in accordance with any applicable international double taxation treaty (by which the Czech Republic is bound) is obliged to deliver to the Fiscal and Paying Agent, together with the Instruction as an integral part thereof, a current proof of its tax domicile as well as other documents that the Fiscal and Paying Agent and the relevant tax authorities may request. Notwithstanding this authorisation, neither the Issuer nor the Fiscal and Paying Agent will verify the accuracy and completeness

of such Instructions and will not be liable for any damage or other harm caused by a delay of the Authorised Person in delivering the Instruction, its inaccuracy or other defect in such an Instruction.

If the above documents (especially the proof of tax domicile) are not delivered to the Fiscal and Paying Agent in the stipulated time period, the Fiscal and Paying Agent will act as if it has not been delivered the documents. The Authorised Person may subsequently deliver such documents proving entitlement to a tax benefit and request the Issuer through the Fiscal and Paying Agent to refund the withholding tax. In such a case, the Issuer has the right to require the Authorised Person to pay a contractual penalty in the amount of CZK15,000 for each such flawed refund application. Such contractual penalty is a lump sum that covers additional expenses incurred by the Issuer in connection with such refund application, additional administrative costs and correspondence and communication with relevant tax authorities.

The Issuer's obligation to pay any amount due in connection with the Bonds will be deemed discharged in a due and timely manner if the relevant amount has been remitted to the Authorised Person in compliance with a proper Instruction pursuant to this Condition 7.5 and if such amount is debited from the account of the Fiscal and Paying Agent no later than on the relevant due date.

Neither the Issuer nor the Fiscal and Paying Agent will be liable for any delay in the payment of any amount due caused by any Authorised Person, e.g. by its failure to deliver a proper Instruction in a timely manner. If any Authorised Person fails to deliver to the Fiscal and Paying Agent in time a proper Instruction, the Issuer's obligation to pay any due amount will be considered met duly and in time if such amount has been remitted to the Authorised Person in accordance with a subsequently delivered due Instruction pursuant to this Condition 7.5 and if such amount has been debited from the Fiscal and Paying Agent's account no later than 10 (ten) Business Days following the day on which the Fiscal and Paying Agent received the proper Instruction. In such an event, the Authorised Person will not have the right to any interest or any yield or additional payment for the time of delay caused by the late sending of the Instruction.

Neither the Issuer nor the Fiscal and Paying Agent will be liable for any damage incurred by (i) the failure to deliver in time the proper Instruction or any other documents or information required to be delivered under this Condition 7.5, or (ii) such Instruction or any related document or information being incorrect, incomplete or untrue, or (iii) circumstances beyond the control of the Issuer or the Fiscal and Paying Agent. In such an event, the Authorised Person will not have the right to any additional payment, compensation or interest for the time of delay caused by the late sending of the Instruction.

7.6 Change in the Payment Method

The Issuer and the Fiscal and Paying Agent are jointly entitled to elect to change the payment procedure, unless such change may adversely affect the position or interests of the Bondholders. The Bondholders will be notified of such change in the manner set out in Condition 15.1. In other cases, such change will be subject to decision by the Meeting in accordance with Condition 13.

8 Taxation

Unless otherwise provided by a law or an international treaty binding on the Czech Republic, the Issuer will not be liable for the payment of any taxes or incur any obligation to pay any taxes in connection with the Bonds, in particular as a result of ownership, transfer or exercise of rights under the Bonds.

The Bond income paid to individuals or legal entities that are Czech tax non-residents or individuals that are Czech tax residents is generally subject to withholding tax levied at source (i.e. by the Issuer when paying the interest on the Bonds). If income is subject to withholding tax, the Issuer is responsible for the withholding of taxes at source.

If the ownership or transfer of, or exercise of rights under, the Bonds is subject to any tax, the Issuer will not be obliged to pay to the Bondholders any amounts as compensation of any such tax.

Tax laws of the Czech Republic and tax laws of the investor's member state may have an impact on the income resulting from the Bonds.

9 Early Redemption of the Bonds upon the Occurrence of Events of Default

9.1 Events of Default

If an Event of Default occurs and is continuing, where for the purposes of this Condition 9.1 an Event of Default is deemed to “be continuing” until it is remedied, the Meeting convened in accordance with Condition 13.1.1 may decide that any Bondholder may, at its own discretion, by a written notice addressed to the Issuer and delivered to the Fiscal and Paying Agent to the address of the Specified Office (the **Early Redemption Notice**), request an early redemption of the at the time outstanding nominal amount of all the Bonds held by it which the Bondholder has not disposed of until that time, together with the accrued and unpaid interest on the Bonds pursuant to Condition 5.1, as of the Early Redemption Date of the Bonds, and the Issuer must redeem the Bonds (together with the accrued and unpaid interest) in accordance with Condition 9.2.

Unless the Meeting convened pursuant to the preceding paragraph decides that the Bondholders may request an early redemption of the Bonds, each Person Authorised to Attend the Meeting (as defined in Condition 13.2.1) who voted according to the minutes of that Meeting for an early redemption or who did not attend the Meeting (the **Applicant**) may, at its discretion, submit an Early Redemption Notice and request an early redemption of the Bonds held by it as of the Meeting Attendance Record Date (as defined below) and not disposed of thereafter and the accrued and unpaid interest on those Bonds in accordance with Condition 5.1, as of the Early Redemption Date of the Bonds, and the Issuer is obliged to redeem such Bonds (together with accrued and unpaid interest) in accordance with Condition 9.2. The Applicant must exercise this right within 30 (thirty) days of the publication date of such Meeting resolution according to Condition 13.5, failing which the right will cease to exist.

(a) Payment Default

Any payment payable to the Bondholders with respect to the Bonds is not paid on the due date and the default remains unremedied for more than 10 (ten) Business Days after the date on which the Issuer was informed of this fact in writing by any Bondholder by a letter addressed to the Issuer and delivered to the Fiscal and Paying Agent to the address of the Specified Office.

(b) Breach of Other Obligations

The Issuer breaches or fails to meet any of its other material obligations (other than those set out in paragraph (a) above and paragraphs (c) to (m) below) in connection with the Bonds (for the avoidance of doubt, as such obligation is considered always the breach of any of the Issuer’s obligations set out in Condition 4, but is not considered the Change of Control pursuant to Condition 10.1), and the breach of, or failure to meet, the obligation is not remedied within (and including) 20 (twenty) Business Days after the date on which the Issuer was informed of this fact in writing by any Bondholder by a letter addressed to the Issuer and delivered to the Fiscal and Paying Agent to the address of the Specified Office. Any debt of the Issuer or a Major Company (other, than the Subordinated Debt), which in aggregate reaches at least CZK50,000,000 or its equivalent in any other currency, (i) becomes prematurely due before the original maturity date other than at the option of the Issuer or Major Company or (provided that there has been no continuing event of default, as interpreted in the relevant debt documentation and howsoever indicated) at the option of the creditor and is not paid within 10 Business Days, unless in the meantime the relevant debt ceases to exist, or (ii) is not paid when it becomes due and such delay lasts more than 10 Business Days, unless this debt ceases to exist in the meantime. Cross default pursuant to this paragraph will not occur if the Issuer or a Major Company acting reasonably, after careful consideration and in good faith, duly invokes, in the manner prescribed by law, the absence of an obligation to comply with its amount or reason and makes payment within the time limit imposed by a final decision of the competent court or other authority which ruled that the Issuer or Major Company is obliged to fulfil that obligation.

Any Bonds held by the Issuer as of the Meeting Attendance Record Date that have not been cancelled by the Issuer within the meaning of Condition 6.3 will not be taken into account for the purposes of determination of the quorum of the Meeting. If the Meeting decides to recall a common representative, any votes belonging to the common representative (if he/she is a Person Authorised to Attend the Meeting) will not be included in the total number of votes. An agreement on appointment of the common representative shall be made available in the manner set out in Condition 15.1.

The Meeting will decide on any issues on its agenda in the form of resolutions. Any resolution that (i) approves a proposal under Condition 13.1.2(a) to 13.1.2(c), or (ii) appoints or recalls a common representative, will require the affirmative vote of a Qualified Majority. Unless otherwise provided by these Terms and Conditions or by law, any other resolutions will require a Simple Majority in order to pass.

13.3.5 Adjournment of a Meeting

If within one hour after the scheduled opening the Meeting does not have a quorum, then such Meeting will be automatically dissolved without further notice. If a Meeting that is to decide on changes of the Terms and Conditions pursuant to Condition 13.1.2 does not have a quorum within one hour after the scheduled opening of the Meeting, the Issuer or another convener of the Meeting will convene, if it is still necessary, a substitute Meeting to be held no later than 6 (six) weeks after the scheduled date of the original Meeting. This right must be exercised by the Applicant within 30 days of the publication date of such Meeting resolution according to Condition 13.5 by a written application (the **Application**) addressed to the Issuer and delivered to the Fiscal and Paying Agent to the address of the Specified Office, failing which the right will cease to exist. The amounts referred to above will become due and payable within 30 days from the date the Application was delivered to the Fiscal and Paying Agent (the **Early Redemption Date of the Bonds**).

If the Meeting disagrees with a Material Change with the exception of a change of the Terms and Conditions in accordance with Condition 13.1.2(a), i.e. where the consent of the Meeting to change them is required by law, the Meeting may at the same time decide that if the Issuer proceeds in violation of the Meeting's decision, the Bondholder may require the payment of the at the time outstanding nominal amount of the Bonds which the Bondholder held as of the Meeting Attendance Record Date, and is not entitled to transfer the Bonds as of that moment, and the Bondholder may further require the payment of the pro-rata interest on such Bonds accrued in accordance with these Terms and Conditions. This right must be exercised by the Applicant within 30 days of the publication date of such Meeting resolution according to Condition 13.5 by an Application addressed to the Issuer and delivered to the Fiscal and Paying Agent to the address of the Specified Office, failing which the right will cease to exist. If the Meeting is convened by a Bondholder or Bondholders, the minutes of such Meeting must also be delivered to the Issuer and the Fiscal and Paying Agent to the address of the Specified Office no later than 30 (thirty) days after the date of the Meeting. The Issuer is obliged to keep the minutes of the Meeting until the rights under the Bonds expire under the statute of limitations. The Issuer is obliged, in person or through its authorised person (especially the Fiscal and Paying Agent), to publish information on all resolutions adopted at the Meeting in the manner set out in Condition 15.1 no later than 30 (thirty) days after the date of the Meeting. If the Meeting discussed a resolution on a Material Change under Condition 13.1.2, a notarial deed must be made about the attendance at the Meeting and about the resolutions of the Meeting, stating the names of the Persons Authorised to Attend the Meeting that voted for a resolution and the number of the Bonds these persons held as at the Meeting Attendance Record Date.

- Location: 72 Moiseyeva St., Martusivka, Kyiv Oblast, 08343
- GLA: 70,000 square meters

BF Martusivka is considered as a competitive warehouse scheme due to location in the surrounding area in 15 km from East Gate Logistics and comparable quality. BF Martusivka is also larger in scale with higher vacancy.

4.2.5 West Gate Logistic

West Gate Logistic is a class A operating warehouse, located at 21st kilometer of Zhytomyr Highway in Stoyanka village, Kyiv-Sviatoshyno District, Kyiv region, Ukraine. Distance to Kyiv city boundaries is only 1 kilometer. Kyiv Rind Road is 8 kilometres away from the property. Closeness to the city provides proximity to labor pools of the Right (Western) Bank of Kyiv and Kyiv region. West Gate Logistic benefits from façade location to Zhytomyr Highway (M-06, E-40), connecting Kyiv to Lviv and Western border with EU.

West Gate Logistic is one of the largest warehouse complexes in Kyiv region with gross building area of 96,351 square meters. West Gate Logistic was built in two phases, both commissioned in 2008. The GLA of the property is 96,221 square meters. The property has 12 metres x 24 metres column grid with 12 metres clear height within the warehouse space typically required by occupiers in line with A-class warehouse standards. The property is occupied by high profile tenants, predominantly logistic operators and retail companies.

Strong tenant mix and very limited impact of COVID-19-associated lockdown on the operations of warehouse real estate market allows West Gate Logistic to maintain almost full occupancy with no changes year-to-year as of 30 June 2020.

NOI generated by West Gate Logistic in 1H 2020 increased by 14.4% year-on-year in comparison to 1H 2019⁴⁰.

⁴⁰ Based on unaudited data of the Issuer.

Key Competitors:

MLP Chaika

- Location: 1A Aviakonstruktora Antonova St., Chaiky, Kyiv Oblast, 08130
- GLA: 114,000 square meters

MLP Chaika is an ambient warehouse comparable in quality located in the same direction - Zhytomyr Highway (M-06, E-40). While MLP Chaika is located closer to Kyiv Ring Road in 4.5 km, the property has no façade location to the highway M-06, E-40 on the secondary road with less convenient access.

Amtel

- Location: 10 Soborna St., Petropavlivska Borshchahivka, Kyiv Oblast, 08130
- GLA: Phase I – 41,000 square meters, Phase II – 52,000 square meters

Amtel is a newer warehouse property consisting of two phases, with Phase I delivered in 2011 and Phase II on the final stage of construction planned for delivery in 2020. Being more competitive in quality and providing availability of new space, Amtel Phase II considered as the main competitor for West Gate Logistics. At the same time, due to the consistent deficit of new storage space on the market, a major share of space was already preleased.

5 Core Markets of the Guarantor and the Group

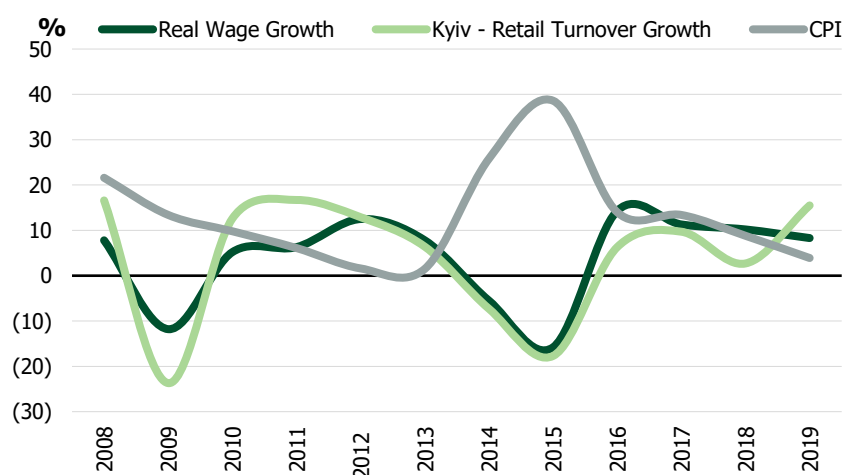

The Guarantor's main activities are investing in real estate sector in Ukraine. The Guarantor is active on the Retail Real Estate Market, the Office Real Estate Market and the Warehouse Real Estate Market of Ukraine, Kyiv region.

5.1 Kyiv Retail Real Estate Market

Retail continued to post healthy trends of growing consumer demand and retail turnover over the last four years. Growth in retail turnover in Ukraine stood at 10.5% year-on-year in 2019, while Kyiv retail turnover growth traditionally outpaced the country average accelerating by 15.5% year-on-year in 2019. The pace of growth in retail turnover achieved in 2019 was the fastest since 2012. The acceleration was driven by expanding household consumption, which remained a key driver of economic growth. Household purchasing power was supported by strong, albeit slowing, growth in salaries, a gradual increase in pensions, election-

related social spending from the state budget and off-budget funds, an upsurge in consumer confidence, and slowing inflation. In nominal terms, the average monthly salary rose by 16.8% in 11M year-on-year in Kyiv, while in real terms, the average salary rose by 8.3% year-on-year supported by decelerating consumer inflation with Consumer Price Index (CPI) recorded at approx. 3.9% in Kyiv as compared to December 2018, down from 8.8% in 2018. In the meantime, the Consumer Confidence Index inched up by 0.5 points month-on-month in December 2019, to 92.2 on a 0-200 scale, advancing by 30 points from the level of 62.2 at the end of 2018.⁴³

The following graph shows the development of Real Wage Growth, Retail Turnover Growth and the CPI in the Kyiv Region⁴⁴:

Occupier demand from existing retailers and new market entries displayed the expansionary trend, reflecting growing retail sales. Among most notable new retailers, the market witnessed the opening of the long-awaited Swedish Mid-range fashion brand H&M in 2018, expanding its presence to three stores in Kyiv by the end of 2019. In 2019 the market welcomed Decathlon (French sportswear retailer), The North Face (American Sportswear), Pylones (French Gift Shop), Claudie Pierlot and Weill (French Luxury Brands), Missha (Korean Health & Beauty).

According to CBRE Kyiv & Regions Retail Market Research Report 2019⁴⁶, four retail schemes entered the market in 2019: two community shopping centers Smart Plaza Obolon (10,000 square meters) and Oasis (13,200 square meters), regional shopping mall River Mall (54,700 square meters) and the superregional Blockbuster Mall (100,000 square meters). Annual new supply totaled approx. 178,700 square meters in 2019, bringing the total retail stock to approx. 1.28 million square meters (+16% YTD). Notwithstanding high volume of new additions, the average vacancy remained roughly unchanged increasing by 1.5 pp YTD to 4.5%, due to a large share of preleased space in new schemes. Rents for retail gallery space in prime shopping centers posted 14-21% increase YTD and ranged from USD85 to USD115 per square meters. In other shopping centers, rents averaged USD44–63 per square meters (+5% YTD).

According to CBRE Kyiv & Regions Retail Market Research Report 2019, approx. 290,000 square meters of retail gallery space is expected for delivery in Kyiv in 2020, including Ocean Mall (100,000 square meters), Retroville (80,700 square meters), Rive Gauche II (50,000 square meters), New Ray (34,500 square meters) and White Lines (27,000 square meters). While the delays in delivery are possible, in case of timely

commissioning, the average market vacancy is expected to increase, potentially decreasing the rental rates, in particular in less competitive shopping centers.

At the same time, provided that consumer demand continues to grow, increasing availability of retail space will attract new cross-border brands to enter the market, expanding the potential demand for retail space. Notably, IKEA (Swedish homeware and department store) has plans to launch an online store with subsequent opening of the physical store in 2020. The potential entries also include Kipling (Belgian Specialist Clothing), Carter's (American Specialist Clothing), Home&You (Polish Homeware and Department Store), AVVA (Turkish Value and Denim) and FLO (Turkish Specialist Clothing). Potential entries in the medium term are also expected from Eataly (Italian food hall & restaurant chain), Sephora (Health & Beauty), Deichmann (German Specialist Clothing), and Debenhams (British Homeware & Department Store).⁴⁷

5.2 Kyiv Office Real Estate Market⁴⁸

Office market remained on the growth path in 2019, following the general improvements in the economy, rapid growth of IT sector and positive shift of business expectations, notwithstanding the cautious approach of corporate occupiers in light of Presidential and Parliamentary Elections in the beginning of 2019. Slower occupier demand expansion at the beginning of the year accelerated in H2 2019. According to CBRE Ukraine, this resulted in annual take-up volume increasing by approx. 17% year-on-year, reaching 170,000 square meters. Over 24% of lease transactions were driven by relocations, while shares of expansion and new entry leases accounted for 28%, respectively. Lease transactions of more than 1,000 square meters dominated the take-up volume with approx. 90% share, indicating that demand for large premises remained strong. Occupiers from the IT sector investigated the opportunities for large areas (more than 10,000 square meters). However, the market has been unable to meet the demand. In the meanwhile, pre-lease practice evidenced in several under-construction projects posed to enter the market by 2020-21 became a noticeable market trend in H2 2019.

Total office stock in Kyiv amounted to approx. 1.8 million square meters (+6% year-on-year) due to the new addition of 100,000 square meters of office space in 2019. In 2019, the average market vacancy marginally increased to 8.5% (+4.2 YTD) as a result of new completions, Wave Tower BC (GLA 15,000) located at 9B Stepana Bandery Avenue, Kyiv, Unit City B10 (10,400 square meters), part of business park located at 3 Dorohozhytska St., Kyiv, 02000 and Sigma BC (GLA 19,000) located at 4 Vatslava Havela Boulevard, Kyiv, 03067 entering the market, the latter - after a change of ownership. Other schemes included small-scale business centers Amarcord (6,700 square meters) located at 30A Holosiivskyi Avenue, Kyiv, 03039 square meters, Palo Alto (5,000 square meters) located at 11 Marshala Rybalka St., Kyiv, 04116 and Zitadelle (3,800 square meters) located at 16 Lavrska st., Kyiv, 01015.

Prime effective rent grew by 8% over 2019, reaching USD27/square meters/month (net of VAT) by the end of the year, as landlords seized the opportunity to increase their rental revenues amidst current deficit of high-quality space anticipating a future increase of new supply in line with the acceleration of development activity in the sector. Therefore, average asking rents ranged between USD26 - USD45/square meters/month e-o-p 2019 with lower and upper bounds increasing by 53% and 29% year-on-year, respectively. Asking rents for B-class office space also followed upward trend as both bounds of the range rose by 16% year-on-year to USD14 – USD30/square meters/month by the end of 2019.

According to real estate consulting agencies⁴⁹, new supply in 2020 is expected to grow to approx 200-250 thousand square meters in line with official developers' announcements. However, the increasing share of pre-leases in projects under construction and a large volume of pent-up demand for high-quality large size units imply that the majority of new space will be absorbed and the average market vacancy will post a slight increase. In case the economy and business activity remain on the growth path, the deficit of the best quality space will remain for some time yet or decrease slightly.

5.3 Kyiv Warehouse Real Estate Market⁵⁰

The demand for modern warehousing space grew on the back of strong retailers and logistics occupiers, with scarce availability of quality space brought to the fore. Annual take-up declined almost to 138,000 square meters (-12% year-on-year) as compared to 2018 due to the scarce volume of vacant space on the market. However, tenants' demand for storage facilities is driven by logistics and retailers. In take-up structure, Logistics operators (+ 25% year-on-year) signed 44% of leasing deals in 2019, reflecting the ongoing expansion of e-commerce in Ukraine. Retailers leased out 45% of take-up volume owing to the accelerating pace of retail turnover growth (+10.5% year-on-year nationwide; +15.5% year-on-year in Kyiv). Another 11% share of take up comprised of Manufacturing, Industrial & Energy companies. Key lease transactions were closed by logistics operators STV in Esma (7,600 square meters) and IN Logistic (10,300 square meters in two locations), Ekol (3,000 square meters) and Zammler (4,600 square meters) in 2019. In retail sector the most notable transactions were relocation & expansion of BudPostach (22,000 square meters), Good Wine (9,800 square meters), Fozzy (7,000 square meters), Kolo (6,000 square meters), and Kosmo (6,000 square meters). One small transaction was finalized in the Wholesale & Retail Trade sector in Q3, namely a 1,700 square meters lease of New Yorker for Zara online shop. Also, a new lease of 9,200 square meters by occupier from Manufacturing, Industrial & Energy segment was recorded.

Annual new supply in 2019 amounted to 22,000 square meters, consisting of one project, Unilogic Logistic Park (Phase III), delivered at the end of 2019. Total competitive warehouse stock increased by 13% YTD to 1.4 million square meters. New space was fully absorbed by the market with vacancy declining further from 3.7% in 2018 to 2.5% by the end of 2019.

Prime asking rent for ambient warehouse started to get back to USD fixation standing in the range of USD5.3 – USD6.3 to USD6/square meters/month (UAH125 - 150/square meters/month (+5% YTD). Thus, with hryvnia appreciation, the lower and upper bound of the range increased in USD-terms by 18% and 11% respectively. Asking rental rates for B-class ambient warehouses followed upward trend rising from USD2.7 – USD3.9/square meters/month (UAH75 - 110/square meters/month) in 2018 eop to USD3.4 – USD4.6/square meters/month (UAH80 - 110/square meters/month) by the end of 2019. Therefore, prime effective rent for A-class premises ranged from USD4.8 - 5.5/square meters/month representing approx. 34% and 8% increase for lower bound and the upper bound respectively.

Improving business sentiment, export growth and strong demand from logistic, retail and e-commerce segments will have a positive impact on the performance of warehouse market in the near future. Scarce availability of vacant space is expected to put the upward pressure on rents to the break-even-point for developers to start new construction, in particular in less risky built-to-suit projects. However, financing constraints continue to have an adverse effect on new development negatively reflecting on the warehouse market by inhibiting new supply. Thus, in 2020 only 61,000 square meters of new supply to be delivered to the market in Amtel Phase II (52,000 square meters), which is almost fully pre-leased. As a result, vacancy is expected to remain low due to large pent up demand and low pipeline.⁵¹

6.3 The Guarantor's Dependence on the Group companies

The Guarantor is an investment entity as defined⁵² by IFRS and invests in the Subsidiaries. The Subsidiaries are investees controlled by the Guarantor. In addition to equity financing to the Subsidiaries, as a part of structuring its investments the Guarantor has number of intragroup loans. The loans are denominated in USD and EUR, unsecured, interest bearing (range from 6.5% to 9.0%) with variable terms of repayment and represent an alternative to the equity way of financing investments. The Guarantor at its capacity of the shareholder may amend any terms of the loans, including modification to convert loans in full or in part into equity.

The Guarantor therefore depends on the income from dividends and other revenues from the Subsidiaries and their ability to meet their obligations under the intragroup loans. The eventual inability of the relevant Subsidiary to repay the loan or facility could affect the Guarantor. 7 Information about Trends

7.1 No Material Adverse Change

The Guarantor declares that, other than changes caused by the COVID-19 outbreak as described in the below section 7.2 below and in other parts of this Prospectus, no material adverse changes in the Guarantor's outlooks have occurred since the date of the most recent audited financial statements of the Guarantor.

The Guarantor also declares that, other than changes caused by the COVID-19 outbreak as described in the below section 7.2 below and in other parts of this Prospectus, no material adverse changes have occurred in the financial performance of the Group since the end of the most recent accounting period for which financial data were published.

7.2 Information about Trends

As at the date of this Prospectus, there are no trends, uncertainties, claims, obligations or events which would be realistically likely to have an adverse impact on the Guarantor's outlooks, other than information related to the COVID-19 outbreak as described in this Section below.

As the Group operates on the real estate market, there are a number of factors and trends that may have an impact on the Group (and thus on the Guarantor).

7.2.1 Retail Market Trends

Household consumption will remain a key economic growth driver in 2020, as low inflation and positive consumer sentiment will support household purchasing power, offsetting a likely further slowdown in nominal salary growth. Increasing pace of retail turnover growth and growing disposable income will continue to attract new retailers to Kyiv retail market supporting the demand for quality retail space.

Growing competition in retail real estate market and reorientation of consumer flows following the potential delivery of several malls in the next 2-3 years are expected, while the shopping centers with most sought-after location & tenant mix are expected to maintain strong position. Renovation and repositioning of existing shopping centres, especially those that are more than 10 years old is expected in order for these shopping centres to stand out from the others in more competitive environment.

The role of food & beverage, entertainment components and service operators is growing and thus more shopping centers will work on creating balanced tenant mix with increasing share of these segments in the

⁵² Source: the Financial Statement of the Guarantor for Year 2019 (p. 16)

total GLA., as well as increasing share of common areas with more space dedicated to comfort of the consumers, thus maximizing the dwelling time and retail turnover.

E-commerce integration into traditional retail, such as introduction of pick up points of large e-commerce retailers) is expected to continue.

In addition, there is a trend of growing importance of transparency between tenants and management companies, such as transparency of footfall, turnover, market lease terms or tenant reviews.

Due to the COVID-19 outbreak, retail real estate market entered lockdown in late March of 2020 with generally solid fundamentals across subsectors. Retail real estate market has been negatively affected the most by the COVID-19 outbreak, with weaker consumption sentiment and a number of non-essential category shops closed from 17 March 2020 due to quarantine, whereas the gradual reopening of shops began taking place from 30 May 2020. Shopping centers felt the most severe impact of lockdown due to closure of non-essential category stores, restaurants, all food & beverage occupiers, entertainment zones and other public venues from 17 March 2020. Most retailers halted their expansion plans or market entry. Strong demand remained only in food, electronics and pharma sectors, while fashion retailers felt the largest drop in sales. COVID-19 outbreak weighed on retail sales and operational results of shopping centers, whereas tenants from non-essential categories of shop received a rent relieve due to closure of their shops or slow recovery of turnover, and many tenants received temporary rental discounts in renegotiations of their leasing terms on individual basis. Future market dynamics will be largely dependent upon the pace of consumer demand recovery and any further measures imposed by the Ukrainian government.

Retail turnover will continue to recover if no new significant shocks occur by the end of 2020 and retailers will gradually return to expansion strategy over the next 6 to 12 months with different pace across retail categories, supporting the demand for quality retail space. Growing competition is expected in the retail real estate market and reorientation of consumer flows following the potential delivery of several malls in the next 2 to 3 years, while the shopping centers with most sought-after location & tenant mix are expected to maintain a strong position. Renovation and repositioning of existing shopping centers, especially those of 10 years old and more in operation is expected to stand out from the others in a more competitive environment. As a result of the COVID-19 outbreak, there is an increased role of safety, disinfection and cleaning in the shopping malls.

Trend of the increasing role of food & beverage areas and entertainment components slows down due to COVID-19-associated social distancing rules but is expected to recover albeit at a slower pace than other retail and will be much dependent on the government measures in respect to those types of tenants. The structural changes in retail market will accelerate, with E-commerce integrating into traditional retail (such as pick up points of large e-commerce retailers in shopping malls).

7.2.2 Office Market Trends

Office market sees growing occupier demand on the back of strengthening business activity and expansion of large IT, High tech & Telecommunication companies, Business Services, and Manufacturing companies. Changing life style and growing needs for flexibility of office space through alternative lease arrangements via serviced office providers, co-working and business accelerators.

There is an increasing share of serviced offices and co-workings in the total take-up indicating the emerging shared workplace culture, especially in creative industries. As the market will become more developed, the relocations strategies of major occupiers will pursue not only the cost cutting, but also to meet talent needs and more efficient use of space through agile space solutions.

Office market further sees increasing demand from occupiers to increase office space, particularly with regards to requests exceeding 10,000 square meters, whereas the occupiers are mainly looking for consolidating the office space. In addition, there is a substantial volume of pent-up demands and increasing share of pre-lettings in projects yet under construction due to low completion volumes in the previous 5 years.

Moderate growth of average market vacancy in a wake of increasing pipeline and completions in 2020-2022 is expected.

Office market remained relatively less affected by the the COVID-19 outbreak and subsequent lockdown measures, posting solid market fundamentals until late March of 2020 before the onset of the COVID-19 outbreak. Leasing demand lost momentum in the the first 6 months of 2020 due to uncertainty associated with the COVID-19 outbreak. Many corporate occupiers halted their decision on relocations and expansions or reconsidered their current footprint. With lockdown measures being introduced, some tenants started negotiations with property owners on temporary rent reductions. As a result, some occupiers were temporarily granted rent discounts, deferred payments or short-term rent-free periods on individual bases.

7.2.3 Warehouse Market Trends

Mismatches of large demand and supply place landlords in a strong position, with only one large scale scheme Amtel Phase II of 52,000 square meters currently being under construction.

The market sees an increasing demand for modern warehouse facilities due to expanding e-commerce segment along with growing requirements from logistics and retailers. In addition, there is an increasing demand for specialized warehouses tailored to agriculture.

The shortage of modern storage facilities will prevail over some time yet pushing the rental rates up. The new development cycle is about to kick-start in 2020-2021 and will be driven by substantial occupier demand with rental rates reaching the break-even point. An increasing number of pre-leases is expected to accelerate absorption pace, with vacancy expected to remain at healthy levels.

The market further sees an interest from international developers to start construction in the nearest future. There is a growing trend of offering of built-to-suit projects tailored to tenants' specific needs.

Financing constraints for development projects continue to have an adverse effect on new development negatively reflecting on the warehouse market by inhibiting new supply.

Warehouse market suffered the least the COVID-19 outbreak and subsequent lockdown measures. Food retailers and E-commerce continued to operate at full capacity partly counterbalancing the negative impact of lockdown on the market and increasing their requirements for storage. In addition, remarkable deficit of warehouse space being recorded over the course of 5 preceding years made the warehouse market more sustainable to the COVID-19 outbreak. Rental discounts were rare oaproxsions, and mostly represented marked-to-market renegotiations for overrented premises. However, due to most rents being denominated in UAH, the market is still imposed to the devaluation risks in case of national currency fluctuations.

- (g) perform any act which:
 - (i) may result in a reduction in the value of the Intragroup Receivables; or
 - (ii) may adversely affect any right of the Security Agent under the Intragroup Receivables Pledge Agreement

with exceptions as provided under the Intragroup Receivables Pledge Agreement (these exceptions are, however, of immaterial nature).

The Security Provider must ensure that without undue delay following the execution of the Intragroup Receivables Pledge Agreement the Negative Pledge is registered in the Pledge Register in the form satisfactory to the Security Agent. The Security Provider must deliver to the Security Agent evidence of the registration of the Negative Pledge in the Pledge Register, or a copy of the entry in the Pledge Register evidencing the registration, within 2 Business Days after the date of the Intragroup Receivables Pledge Agreement.

In the event that the Intragroup Receivables pledge becomes enforceable, the Security Agent (after meeting other conditions under the Intragroup Receivables Pledge Agreement) may enforce the security in the following manners: the right to collect and enforce any amounts payable in respect of any Intragroup Receivables, direct sale and assign the Intragroup Receivables to the Security Agent.

The Intragroup Receivables pledge shall cease to exist on the date on which all the Secured Debts have been unconditionally and irrevocably paid and discharged in full and the Secured Parties (as defined in the Intercreditor Agreement) are under no further obligation to provide financial accommodation to, or enter into a transaction with, the Issuer under the Bonds.

The Intragroup Receivables Pledge Agreement, any obligations under it and any non-contractual obligations arising in connection with it are governed by Czech law. The pledge and any prohibitions created as rights *in rem* created or to be created under the Intragroup Receivables Pledge Agreement are governed by Czech law. The courts of the Czech Republic have exclusive jurisdiction to settle any dispute in connection with the Intragroup Receivables Pledge Agreement.

XIII. TAXATION

It is recommended that parties interested in acquiring any Bonds consult their legal and tax advisors (taking into account all the relevant factual and legal circumstances relevant to their particular situation) with regard to the tax, foreign exchange and legal consequences of purchasing, holding and selling the Bonds and receiving payments under the tax and foreign exchange legislation in effect in the Czech Republic and the countries where such parties reside, as well as countries in which proceeds from holding or selling the Bonds could be taxed.

The tax regulations of the Czech Republic and the tax regulations of the investor's Member State may have an impact on the income from the Bonds.

As the tax regulations may change, the yield on the Bonds will be taxed in accordance with the applicable legislation at the time of redemption.

The Issuer shall not provide Bondholders with any compensation in relation to any tax.

The following brief summary of selected tax impacts regarding the purchasing, holding and selling of the Bonds and foreign exchange regulation in the Czech Republic is mainly based on Czech Act No. 586/1992 Coll., on Income Taxes, as amended and Slovak Act No. 595/2003 Coll., on Income Tax, as amended and related legislation effective as of the date of this Prospectus, as well as the prevailing interpretation of these laws and other regulations applied by the Czech and Slovak tax and other state authorities that are known to the Issuer as of the date of this Prospectus. However, the information contained herein is not intended and should not be construed as legal or tax advice. All the information below is of a general nature (it does not take into account, for example, the possible specific tax regime of selected potential acquirers such as investment funds, mutual funds, pension funds, etc.) and may change depending on changes in applicable legislation that may occur after that date, or in the interpretation of such legislation that may be applied after that date.

The description below assumes that the person receiving any payments arising from the Bonds is the beneficial owner of such income, i.e. that person is not an agent or depositary who receives such payments on behalf of another person.

1 Taxation in the Czech Republic

Interest Income

Interest income (as well as income in the form of the difference between the nominal value of the Bond paid and its issue price, or between the redemption price of the Bond at its early redemption and its issue price (**Interest Income**) paid to a natural person is subject to a special rate of withholding tax withheld at source (i.e. by the Issuer as the tax payer when Interest Income is paid). The rate of the withholding tax is 15%. However, if the recipient of the Interest Income is a natural person who is not a Czech tax resident, does not hold the Bonds through a permanent establishment in the Czech Republic and is not a tax resident of another EU Member State or other states forming the European Economic Area (**EEA**) or a third country with which the Czech Republic concluded a valid and effective international double taxation treaty or an international agreement on the exchange of information in tax matters in the field of income taxes, including a multilateral international treaty, the withholding tax rate is 35%. In the case of natural persons who are Czech tax residents, the above mentioned withholding tax represents the final tax liability of interest income on the Bonds in the Czech Republic. In the case of natural persons who are tax residents in an EU/EEA-Member State and decide to include the interest income in a Czech tax return, the above mentioned withholding tax represents a tax advance. A natural person having a permanent establishment in the Czech Republic is generally obliged to file a tax return in the Czech Republic.

Interest Income (as opposed to natural persons, for corporate income taxpayers, the difference between the price of the Bond on its early redemption and its lower issue rate is not considered as interest) paid to a corporate income taxpayer that is a Czech tax resident or not a Czech tax resident but holds the Bonds

through a permanent establishment in the Czech Republic is not subject to withholding tax and forms part of the general corporate income tax at the rate of 19% (in the case of non-resident taxpayers, the Issuer may be obliged to hedge this tax - see below). Interest Income paid to a corporate income taxpayer that is not a Czech tax resident and does not hold the Bonds through a permanent establishment in the Czech Republic is subject to a special rate of withholding tax withheld at source (i.e. by the Issuer as the tax payer when Interest Income is paid). The rate of the withholding tax is 15%. However, if the Interest Income recipient is a corporate income taxpayer that is not a Czech tax resident, does not hold the Bonds through a permanent establishment in the Czech Republic and is not a tax resident of another EU/EEA-Member State or a third country with which the Czech Republic has a valid and effective international double tax treaty or international tax information exchange agreement for income tax matters, including a multilateral international treaty, the withholding tax rate is 35%. In the case of corporate income taxpayers that are residents of another EU/EEA-Member State, do not hold the Bonds in the Czech Republic through a permanent establishment and decide to include the Interest Income in the tax return in the Czech Republic, the above mentioned withholding tax represents a tax advance. If the Interest Income accrues to the Czech permanent establishment of a corporate income taxpayer that is not a Czech tax resident and is not a tax resident of an EU/EEA-Member State, the Issuer is obliged, when paying the Interest Income, to withhold a securing tax of 10 per on this income (unless the tax administrator decides to reduce or waive this obligation). In general, a corporate income taxpayer doing business in the Czech Republic through a permanent establishment is obliged to file a tax return in the Czech Republic and any deducted tax security is included in the total tax liability reported in the tax return.

A double taxation treaty between the Czech Republic and the country where the recipient of the Interest Income is resident for tax purposes may exclude or reduce the tax rate in the Czech Republic (in the case of a natural person including the redemption of the Bond before its maturity), generally provided that the income it is not attributable to a permanent establishment which the recipient has in the Czech Republic. To benefit from the double taxation treaty, the taxpayer is subject to the condition that the recipient is a resident of the relevant state and is the beneficial owner of the income paid.

Capital Gains/Losses

Income realised from the sale of the Bonds by a natural person who is a Czech tax resident or who is not a Czech tax resident but either holds (sells) the Bonds through a permanent establishment in the Czech Republic or the income from the sale of the Bonds comes from a Czech tax resident buyer or from a Czech permanent establishment of a non-Czech tax resident buyer is included in the general tax base, within which it is subject to personal income tax at the rate of 15%. If this income is realized as a part of separate (business) activities of a natural person, such income may also be subject to a solidarity surcharge tax of 7% of the positive excess of the total sum of income included in the partial tax base from employment activities and the partial tax base from business activities in the relevant taxable period, and the amount of 48-times the average wage (CZK1,672,080 for 2020). Losses from the sale of the Bonds are generally non-tax-deductible for non-business individuals unless taxable income from the sale of other securities is reported in the same tax period; in such a case, losses from the sale of the Bonds up to the amount of income from the sale of other securities may be offset against each other.

Income from the sale of the Bonds that have not been held in connection with the business activities of a natural person is generally exempt from personal income tax, unless the worldwide income from the sale of all securities and unit income per unit upon cancellation of the mutual fund in the relevant tax period exceeds CZK100,000. In addition, the income from the sale of the Bonds that have not been held in connection with the business activities of a natural person is generally exempt from personal income tax if at least 3 years elapse between the acquisition and the sale of the Bonds (this exemption does not apply to income from future consideration transferred within 3 years of acquisition).

Income from the sale of the Bonds realized by a corporate income taxpayer that is a Czech tax resident or is not a Czech tax resident but either holds the Bonds through a permanent establishment in the Czech Republic or receives the income from the sale of the Bonds from a Czech tax resident, or from a Czech permanent establishment of a buyer that is not a Czech tax resident is included in the general corporate income tax base and is subject to a corporate income tax of 19%. Losses from the sale of the Bonds are generally tax-deductible for these persons. According to some interpretations, these losses are not deductible for corporate income

taxpayers that are Czech non-resident taxpayers and do not keep accounting books according to Czech accounting regulations.

The income for the sale of the Bonds realized by a natural person or a corporate income taxpayer that is not a Czech tax resident, does not hold the Bonds through a permanent establishment in the Czech Republic and the income from the sale of the Bonds does not come from a Czech tax resident buyer or from a Czech permanent establishment of a non-Czech tax resident buyer is not subject to tax in the Czech Republic.

In the case of the sale of the Bonds by a natural person or corporate income taxpayer that is not a Czech tax resident or a tax resident of an EU/EEA-Member State to a Czech tax resident buyer or a non-Czech tax resident buyer doing business in the Czech Republic through a permanent establishment to which the remuneration is assigned, the buyer is generally obliged to withhold the securing tax of 1% of the purchase price of the Bonds when paying the purchase price of the Bonds.

A seller who receives income from the sale of the Bonds taxable in the Czech Republic is generally obliged to file a tax return in the Czech Republic, with the tax security being credited against its final tax liability. A double tax treaty between the Czech Republic and the country in Bonds the seller of the Bonds is resident for tax purposes may exclude taxation of profits from the sale of the Bonds in the Czech Republic, including tax security, provided that the seller does not hold the Bonds through a permanent establishment in the Czech Republic. To benefit from the double taxation treaty, the taxpayer is subject to the condition that the recipient is a resident of the relevant state and is the beneficial owner of the income paid.

2 Taxation in the Slovak Republic

Taxes on the Bonds in the Slovak Republic

Under the Income Tax Act, income of legal person is subject to a 21% rate of tax and income of natural persons is subject to a 19% rate of tax, except for income exceeding 176.8 times the subsistence minimum that is subject to a 25% rate of tax.

Withholding tax has a rate of 19%; if such income is paid, remitted or credited to a non-contracting state taxpayer, a tax rate of 35% shall apply. List of taxpayers of non-contracting states is published on the website of the Ministry of Finance of the Slovak Republic.

If the recipient of yield proves to the Issuer that he is a tax resident of the Slovak Republic and the real owner of yield, this yield is not subject to withholding tax in the Czech Republic and is taxable only in the Slovak Republic in accordance with the double taxation agreement between the Czech Republic and Slovakia. If the recipient yield does not provide the Issuer with the above information, the Issuer will apply withholding tax of 35% from the yield.

Income tax on yield (interest income)

According to the applicable provisions of Slovak Act No. 595/2003 Coll., in Income Tax, as amended.

- (a) the yield on the Bonds received by a tax resident is subject to the income tax in the Slovak Republic;
- (b) the yield on the Bonds received by a tax resident, who is a natural person, will be included in the tax return and will be taxed at a 19% tax rate; and
- (c) the yield on the Bonds received by a tax resident, who is a legal person, will be included in its general tax base and will be taxed at a 21% tax rate.

Because the income tax law may change during the life of the Bonds, the yield on the Bonds will be taxed pursuant to the law applicable at the time of its payment.

The Issuer will not provide the holders of the Bonds with any compensation or gross-up in connection with any tax withholding.

Income tax on sale

The profit from sale of the Bonds generated by a legal person who is a Slovak tax resident or a permanent establishment of a tax non-resident - a legal person with its registered office outside the territory of the Slovak Republic are included in the general tax base taxed by the applicable corporate income tax rate. Losses from sale of the Bonds calculated on a cumulative basis for all. Bonds sold during a single taxable period are generally not tax recognised, except for specific cases provided by law.

The profit from sale of the Bonds generated by a natural person who is a Slovak tax resident or a permanent establishment of a tax non-resident - a natural person with its residence outside the territory of the Slovak Republic are generally included in the common tax base for the natural person income tax. Any losses from sale of the Bonds cannot be deemed to be tax recognised. If a natural person owns the Bonds for more than one year, the profit from sale of the Bonds is exempt from the natural person income tax.

XIV. ENFORCEMENT OF CIVIL LIABILITIES AGAINST THE ISSUER AND THE GUARANTOR

The information contained in this Chapter is provided only as general information to characterize the legal situation and has been obtained from publicly available sources. Neither the Issuer nor its advisers make any representation as to the accuracy or completeness of the information included herein. Any prospective purchasers of the Bonds should therefore not rely solely upon the information included herein and should contact their legal advisers for consultation about the enforcement of claims in respect of the Issuer's private law liabilities within any relevant jurisdiction.

1 Enforcement of Civil Liabilities in the Czech Republic

Pursuant to the Terms and Conditions, the court competent for resolving any disputes between the Issuer and the Bondholders in relation to the Bonds arising from the Terms and Conditions is the Municipal Court in Prague.

The Issuer has not granted its consent to the jurisdiction of a foreign court in connection with any lawsuit commenced on the basis of the acquisition or in connection with the holding of the Bonds, nor did it appoint a representative for proceedings in any country. As a result, it may be impossible for the acquirer of the Bonds to commence any proceedings against the Issuer or require foreign courts to issue court decisions against the Issuer or require the observance of the decisions issued by such courts that are based on the provisions of foreign legal regulations.

The recognition and enforcement of foreign judgments in civil and commercial matters in the Czech Republic is governed by EU law, public international treaties and Czech law. In relation to the Member States of the European Union, EU Regulation 1215/2012 of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (**Regulation 1215/2012**) is directly applicable in the Czech Republic. Under this regulation, court rulings issued by any court authority in the EU Member States with regard to civil and commercial matters are enforceable in the Czech Republic, subject to the rules set forth therein and, conversely, court rulings issued by court authorities in the Czech Republic with regard to civil and commercial matters are reciprocally enforceable in the EU Member States.

Unless the parties to the dispute agreed otherwise, or unless courts of a different Member State have an exclusive jurisdiction, foreign entities are able to bring civil proceedings before Czech courts against individuals and legal entities domiciled therein. In court proceedings, Czech courts apply their respective national procedural rules and their judgments are enforceable in the Czech Republic, subject to certain statutory limitations on the ability of creditors to enforce judgments against certain assets.

Any person bringing an action in the Czech Republic may be required to: (i) submit to the court in the Czech Republic a translation to the Czech language of any relevant document prepared by a sworn translator authorised by such court; and (ii) pay a court filing fee.

In the event that court judgments against the Issuer are issued by court bodies of non-EU Member States, the following rules shall apply:

In cases where the Czech Republic or the European Union has concluded an international treaty with a specific country on the recognition and enforcement of court rulings, the recognition and enforcement of court rulings issued in such country is processed in accordance with the provisions of the applicable international treaty. If no international treaty on the recognition and enforcement of court rulings exists, then the rulings of foreign courts shall be recognised and enforced in the Czech Republic in accordance with Czech Act No. 91/2012 Coll., on private international law, as amended (the **Czech Private International Law Act**) and other relevant legislation. In the event of a foreign ruling against a Czech individual or legal entity, such a foreign ruling shall be recognised and enforced if, among other things, actual reciprocity has been

established regarding the recognition and enforcement of judgments rendered by Czech courts in the relevant country.

The Ministry of Justice of the Czech Republic shall provide the court, upon request, with a declaration on reciprocity by a foreign country. If such declaration of reciprocity has not been issued with regard to a particular country, however, this does not automatically mean that reciprocity does not exist in a given case. The court will take into account the declaration of the Ministry of Justice of the Czech Republic on reciprocity by a foreign state as a piece of evidence.

Even if reciprocity has been established, under the Czech Private International Law Act, the decisions of foreign states' justice bodies and decisions of foreign state authorities on rights and obligations which, according to their private law nature, would be decided by courts in the Czech Republic as well as foreign court conciliations and foreign notarial deeds and other public instruments in these matters (jointly also referred to as the **Foreign Decisions**) cannot be recognized and enforced if (i) the matter falls within the exclusive jurisdiction of the courts of the Czech Republic, or in the event that the proceedings could not be conducted by any authority of a foreign state should the provisions on the jurisdiction of Czech courts be applied to considering the jurisdiction of the foreign authority, unless the party against whom the decision was issued voluntarily submitted to the authority of the foreign body; (ii) proceedings are underway before a Czech court with regard to the same legal matters and if the said proceedings commenced prior to the proceedings abroad in which the judgement whose recognition has been proposed was issued; (iii) a Czech court has issued a final judgment in the same matter, or a final judgment of a third-country authority has already been recognized in the Czech Republic; (iv) the foreign authority deprived the party to the proceedings against whom the judgment was made of the opportunity to properly participate in the proceedings, in particular, if such party had not been duly served for the purposes of the initiation of the proceedings; or (v) the recognition of a foreign judgment would be contrary to the public order. The obstacles referred to in points (ii) to (iv) above shall be taken into account only if they are invoked by the party against whom the foreign decision is to be recognized, unless the existence of the obstacle (ii) or (iii) is otherwise known to the authority deciding on recognition.

The courts of the Czech Republic would not consider the merits of an action brought in the Czech Republic on the basis of any breach by the Issuer of public law of any country other than the Czech Republic, in particular any action for breach of any foreign securities law.

Foreign exchange regulation

The issue and acquisition of the Bonds is not subject to any foreign exchange regulation in the Czech Republic.

Under Czech Constitutional Act No. 110/1998 Coll., on security of the Czech Republic, the Czech Government or its Prime Minister may declare an emergency (in Czech: *nouzový stav*). If the Czech Government declares an emergency, payments in foreign currency or abroad generally, interbank transfers of monies from abroad to the Czech Republic and/or sale of securities (including the Bonds) abroad may be suspended in accordance with Czech Act No. 240/2000 Coll., on crisis management and amendment to certain acts, as amended, for the duration of such emergency. Such an emergency may be declared for a maximum period of 30 days unless prolonged by the approval of the Chamber of Deputies of the Parliament of the Czech Republic.

2 Enforcement of Civil Liabilities in Cyprus

Any final and conclusive judgement to be issued by the Czech courts in relation to the Bonds arising from the Terms and Conditions, which is enforceable in the Czech Republic, will be recognised and enforced by a District Court in the Republic of Cyprus, subject to the provisions and requirements of Regulation 1215/2012.

To this end, the relevant District Court should be furnished with the following documents:

- (a) a copy of the judgment which satisfies the conditions necessary to establish its authenticity (i.e. an original or duly certified copy thereof);
- (b) a certificate issued by the Municipal Court in Prague in the form provided in Annex I of Regulation 1215/2012; and
- (c) a translation of the said documents into Greek.

The said documents would be presented before the Registrar of the appropriate District Court by way of a letter notifying him/her of the issuance of the judgment in question. The Registrar would then automatically “register” the judgment in question in the Republic of Cyprus, by opening a Court file to that effect and assigning a serial number thereto, without need arising for an application to be filed before the Court to this end.

It should be noted that, as provided for under Article 45 of Regulation 1215/2012, the recognition of a judgment issued by the Municipal Court in Prague can be refused at the request of any interested party for any of the reasons stated therein, namely:

- (a) If recognition is manifestly contrary to the public policy of the Republic of Cyprus; there is no legislative provision which defines the concept of public policy and the relevant case law on the matter has attempted to describe the said notion as the fundamental values which a society recognises at a specific time period (see, for example, *Attorney General of the Republic of Kenya v. Wirtschaft AG* (1999) 1A CLR 585). A Cypriot court would, therefore, refuse to recognise a foreign judgment in case that the judgment in question is deemed to be at variance to an unacceptable degree with the legal order of the Republic of Cyprus in as much as it would infringe a fundamental principle or would impact on the orderly functioning of the legal, social or commercial life of the Republic of Cyprus. It should be clarified that the public policy principle is very rarely invoked before the Cypriot courts in cases involving the recognition and enforcement of foreign judgments, especially of judgments issued by another EU Member State.
- (b) Where the judgment was given in default of appearance, if the defendant was not served with the document instituting the proceedings or an equivalent document in sufficient time and in such a way as to enable him or her to arrange for his or her defence;
- (c) Where the judgment is irreconcilable with another judgment given in a dispute between the same parties in the Republic of Cyprus;
- (d) Where the judgment is irreconcilable with an earlier judgment given in another Member State or in a non-Member State between the same parties and involving the same cause of action, where the earlier decision fulfils the conditions required for recognition in the Republic of Cyprus;
- (e) Where the judgment conflicts with sections 3, 4 or 5 of Chapter II (i.e. jurisdiction in matters relating to insurance, consumer contracts and employment contracts) and with section 6 of Chapter II (i.e. the provisions for exclusive jurisdiction for example) of Regulation 1215/2012.

Under no circumstances will the substance of the judgment be, however, reviewed by a Cypriot court, as provided for by Article 52 of Regulation 1215/2012.
